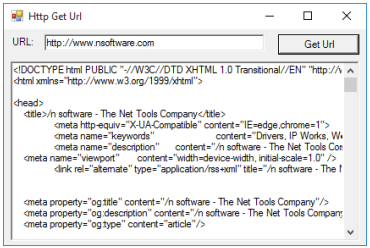
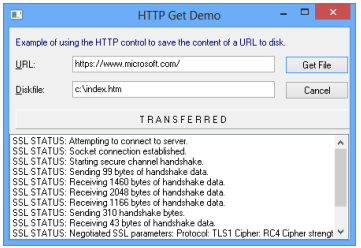
Top 50 Product | Top 25 Publisher | Enterprise Partner

A comprehensive suite of Internet components. Any protocol, any platform, any IDE.

Publisher: /n software | Category: Communication & Messaging

Components for every major protocol from FTP to IMAP to SNMP, SSL and SSH security, S/MIME encryption, Digital Certificates, Credit Card Processing, ZIP compression, Shipping and Tracking, and e-business (EDI) transactions.





Exceptionally Responsive

Based on a highly optimized exceptionally responsive asynchronous socket architecture, the components consume a minimum of system resources while providing a high degree of compatibility with existing systems.

Enterprise Class Security

Robust enterprise-class security with up to 256-bit strong encryption using SSL and Digital Certificates. Authenticate and encrypt/decrypt data sent and received using SSL2, SSL3, TLS, TLS 1.1 or TLS 1.2.

Core Components

IP*Works! is a comprehensive framework for Internet development. It provides programmable, SSL-enabled components for sending email, transferring files, managing networks, browsing the Web and much more.

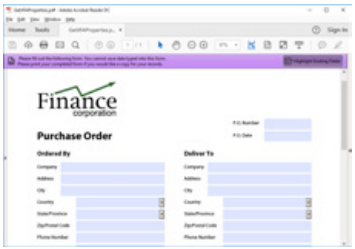
Aspose.Total for .NET

#5 Product | #3 Publisher | Enterprise Partner

Open, create, convert, print & save files from within your own applications.

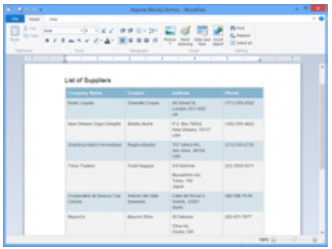
Publisher: Aspose | Category: Document & Text Processing | ★★★★★

Aspose.Total for .NET is a compilation of every .NET component offered by Aspose. It allows you to create a wide range of applications that work with file formats from Excel, Word, PowerPoint, Project, OneNote, Outlook, Visio and PDF.



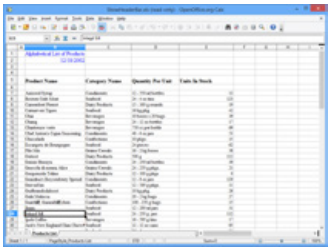
Aspose.Pdf for .NET

Includes a set of APIs for PDF document creation and manipulation, without using Adobe Acrobat. You can also transform each page of a PDF into conventional image formats such as BMP, JPEG, PNG and GIF.



Aspose.Words for .NET

An advanced class library that lets you perform a wide range of document processing tasks directly within your applications. Supports DOC, OOXML, RTF, HTML, OpenDocument, PDF, XPS, EPUB and many other formats.



Aspose.Cells for .NET

Enable .NET applications to create, modify, convert, render and print Excel spreadsheets without Microsoft Excel installed on the server. Supports XLS, XLSX, XLSM, XLTX/XLTM, HTML, CSV, ODS, PDF and more.

ASPOSE File Format APIs

Prices from 2.442,00 €

www.componentsource.com/aspose-total-net

File Format APIs

Open, Create, Convert, Print and Save files from your applications!

ASPOSE
File Format APIs

Aspose.Total

Enable your applications to manipulate Word, Excel, PDF, PowerPoint, Outlook and more than 100 other file formats for all major platforms.

Aspose.Words

Create, edit, convert or print Word documents (DOC, DOCX, RTF...)

Aspose.Cells

Create, Edit or Convert Excel worksheets (XLS, XLSX, ODS...)

Aspose.Pdf

Manipulate PDF file formats (PDF, PDF/A, XPS...)

Aspose.Slides

Create, edit or convert PowerPoint presentations (PPT, PPTX, ODP...)

Aspose.Email

Manipulate Email file formats (MSG, PST, EML...) and popular network protocols.

Aspose.BarCode

Generate or recognize barcodes (Code128, PDF417, Postnet...)

- Aspose.Imaging
- Aspose.Tasks
- Aspose.OCR
- Aspose.Diagram
- Aspose.Note
- Aspose.HTML

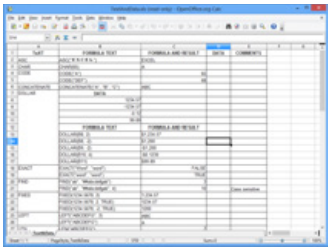
Aspose.Cells for .NET

Top 50 Product | #3 Publisher | Enterprise Partner

Manipulate and convert spreadsheet files from within your own applications.

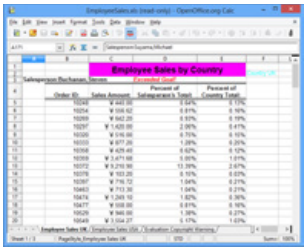
Publisher: Aspose | Category: Spreadsheet | ★★★★★

Aspose.Cells for .NET provides flexible components that enable .NET applications to create, modify, convert, render and print Excel spreadsheets without requiring Microsoft Excel to be installed on the server.



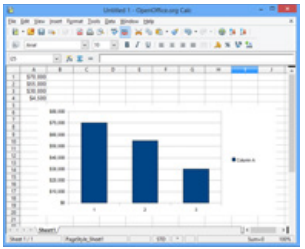
Supported File Formats

Aspose.Cells for .NET supports XLS, XLSX, XLSM, XLSB, XLTX, XLTM, CSV, SpreadsheetML and ODS file formats. It also allows you to export Excel files to PDF, XPS, HTML, MHTML, TIFF, JPG, PNG, BMP and SVG.



Comprehensive Formatting

Aspose.Cells for .NET gives you absolute control over how your data is presented by offering advanced formatting features. You can apply individual formatting to a worksheet, row, column or cell.



Advanced Features

Save and open Excel files to and from streams, send generated output to client browsers and easily import formulas, images and charts from spreadsheets.

ASPOSE File Format APIs

Prices from 814,00 €

www.componentsource.com/aspose-cells-net

Manipulating Documents?

GROUPDOCS
Document Manipulation APIs

APIs to view, convert, annotate, compare, sign, assemble and search documents in your applications.

Microsoft .NET

GroupDocs.Viewer
View over 50 documents and image formats in any application using document viewer APIs.

GroupDocs.Annotation
Add annotations to specific words, phrases and any region of the document.

GroupDocs.Conversion
Fast batch document conversion APIs for any .NET, Java or Cloud application.

GroupDocs.Comparison
Compare two documents and get a difference summary report.

GroupDocs.Signature
Digitally sign Microsoft Word, Excel, PowerPoint and PDF documents.

GroupDocs.Assembly
Document automation APIs to create reports from templates and various data sources.

- GroupDocs.Metadata
- GroupDocs.Search
- GroupDocs.Text
- GroupDocs.Editor

CData ADO.NET Subscription

Comprehensive access to data from ADO.NET.

Top 50 Publisher

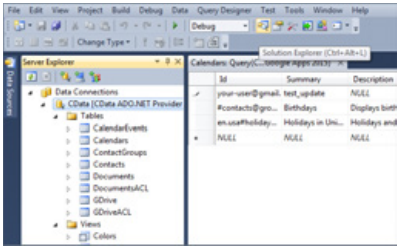
Enterprise Partner

Publisher: CData Software | Category: Data Access

Real-time data integration from 80+ SaaS, NoSQL, and Big Data sources. Includes a single SQL interface to data that insulates users from the challenges and complexities of integrating with individual APIs, SDKs, and services.

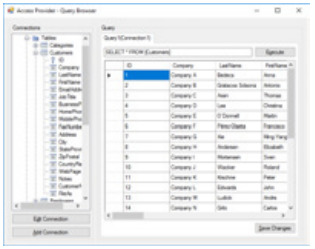
Connect .NET Apps to Data

Comprehensive access to application, database, and Web API data through easy-to-use tools. Whether you are building Desktop, Web, or Mobile apps you can use the drivers for fast and secure access to data.



Visual Studio Integration

The ADO.NET Data Providers can be used to access and explore data directly from the Visual Studio Server Explorer. These constructs return live data that you can work with directly from within Visual Studio.



Access Data from any .NET App

Use objects to connect to data just as you would any traditional database, through the Visual Studio Server Explorer, in code, and in data controls like DataGridView, GridView and DataSet.

cdata

Prices from 814,00 €

www.componentsource.com/cdata-ado-net-subscription

CData Excel Add-In Subscription

Top 50 Publisher

Enterprise Partner

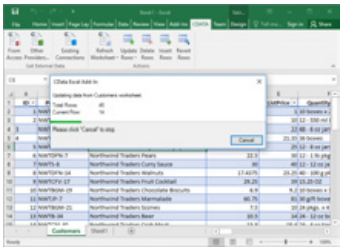
Access to applications, databases, and Web APIs directly from Excel worksheets.

Publisher: CData Software | Category: Data Access Infrastructure

CData Excel Add-In Subscription gives Excel users unlimited access to real-time data from an extensive list of applications, databases, and SaaS sources. From Big Data and NoSQL databases, to CRM, ERP, and accounting systems.

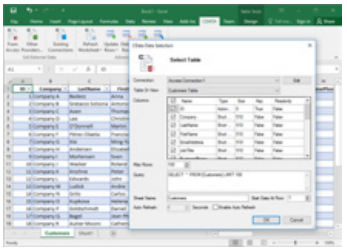
Included Data Sources

CData Excel Add-In Subscription includes 75+ data sources including Amazon DynamoDB, Authorize.Net, Facebook, Google AdWords, Microsoft Access, MySQL, Office 365, PayPal, QuickBooks and Xero Accounting.



Bi-Directional Access

Perfect for mass imports/exports/updates, data cleansing and Excel based data analysis. You can also modify and delete records, quickly export and backup data, and work on data with charts and pivot tables.



Easily Connect to Data

Users simply supply their credentials to create a connection and can immediately begin working with live data. The Excel Add-In is completely self-contained; no additional software installation is required.

cdata

Prices from 243,00 €

www.componentsource.com/cdata-excel-add-in-subscription

CData ODBC Driver Subscription

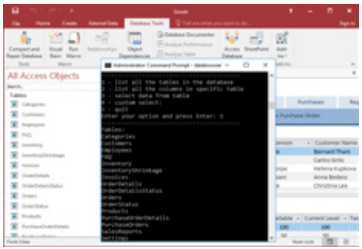
Top 50 Publisher

Enterprise Partner

Connecting to data has never been easier.

Publisher: CData Software | Category: Data Access

CData ODBC Driver Subscription gives you access to live SaaS Apps, NoSQL, and Big Data from desktop clients through standard ODBC connectivity.

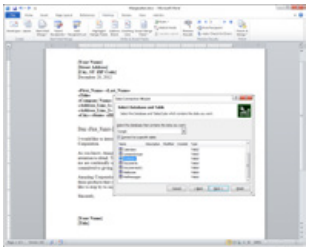


Connect to Live Data

The drivers include a library of 50+ functions, including String, Date and Numeric that can manipulate column values into the desired result. Popular examples include Regex, JSON, and XML processing functions.

Read & Write Data through ODBC

CData ODBC Driver Subscription includes 75+ data sources including Apache HBase, Azure Table, Gmail, Google Sheets, MailChimp, Microsoft Dynamics, SharePoint, SQLite, Sugar CRM, and YouTube Analytics.



Connect from Office Tools

Any application that can access data through ODBC, like Microsoft Excel, PowerPivot, or Word, can leverage the ODBC Drivers to connect to real-time data and help you with powerful capabilities like mail merge.

cdata

Prices from 325,00 €

www.componentsource.com/cdata-odbc-driver-subscription

CData PowerShell Cmdlet Subscription

Top 50 Publisher

Enterprise Partner

Access data directly from the PowerShell command-line.

Publisher: CData Software | Category: Data Access Infrastructure

The PowerShell Cmdlet Subscription offers straightforward access to live data from popular NoSQL and Big Data databases, CRM, ERP, accounting systems, marketing automation, cloud platforms, and more.

Real-time Access to Data

The Cmdlets offer a simple Transact-SQL interface for connecting with data, in a virtually identical way to how a user would interact with a relational database from PowerShell.

PowerShell Data Integration

Comprehensive access to application, database, and Web API data through familiar tools. The included Cmdlets enable PowerShell users to quickly and easily work with live data from virtually anywhere.

Clean & Normalize Data

Use PowerShell scripting to normalize and/or de-duplicate data or pipe data from various sources into flat-files, databases, and other data stores for archival, back-up and synchronization purposes.

cdata

Prices from 325,00 €

www.componentsource.com/cdata-powershell-cmdlet-subscription

CData SSIS Component Subscription

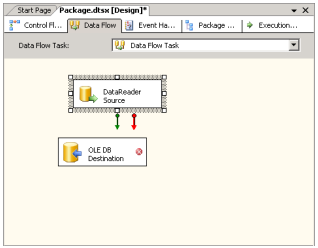
Top 50 Publisher

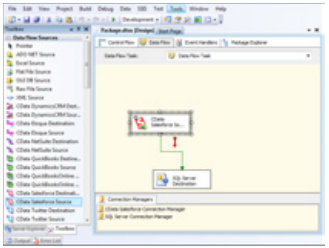
Enterprise Partner

Easily connect SSIS Workflows to applications, databases and Web APIs.

Publisher: CData Software | Category: Data Access Infrastructure

CData SSIS Component Subscription provides an easier and faster way to connect SQL Server with data. It offers straightforward access to NoSQL, Big Data, and SaaS Service data through standard SSIS Workflows.





Connect SQL Server with Data

The SSIS Subscription offers access to all CData SSIS Components, providing SSIS Workflows with access to applications, databases and Web APIs, in minutes, through SQL Server Integration Services.

Included Data Sources

Integration with 80+ SaaS, NoSQL, & Big Data sources including Amazon SimpleDB, FreshBooks Accounting, Google Apps, Microsoft Dynamics, Office 365, QuickBooks, Salesforce & Force.com and Sugar CRM.

SQL Server Integration

Use CData Data Flow Tasks to connect SQL Server with data without expensive custom integration or application development. Includes full Create, Read, Update, and Delete (CRUD) support.

cdata

Prices from 651,00 €

www.componentsource.com/cdata-ssis-component-subscription

Know SQL?

Connect to 80+ data sources (NoSQL, Big Data, SaaS, etc.) through standard SQL queries.

ODBC JDBC ADO.NET SSIS CLOUD BIZTALK EXCEL MOBILE

SQL is the language of data, and our state-of-the-art Drivers let you leverage the full power of SQL to connect with hundreds of applications, databases, and APIs. Through standards-compliant Driver technologies like ODBC, JDBC, ADO.NET, & OData, you can read, write, and update live data, from any data source, using standard SQL queries.

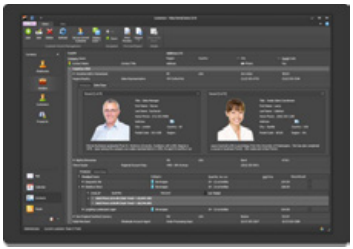
DevExpress Universal

#2 Product | #1 Publisher | Enterprise Partner

All DevExpress Visual Studio products in one integrated subscription.

Publisher: DevExpress | Category: Presentation Layer | ★★★★½

Includes charts, data grids, spreadsheets, calendars, schedulers, diagrams, navigation, text editors, PDF, maps, gauges, tiles and data editors. Supports ASP.NET WebForms & MVC, WinForms, WPF, Windows 10 and HTML5/JS.



Present Your data, Your Way

With patent-pending server side data processing, DevExpress Data Grid is a full featured editing & data shaping component allowing end-users to easily manage information and display it as requirements dictate.

HTML5/JS Framework

A JavaScript development framework that allows you to create store-ready, multi-device applications across platforms and devices. Each widget includes a jQuery plugin and bindings to AngularJS and KnockoutJS.

Dashboard

Create insightful and information rich decision support systems for executives and business users across platforms and devices. Results are immediate, accurate and always relevant.

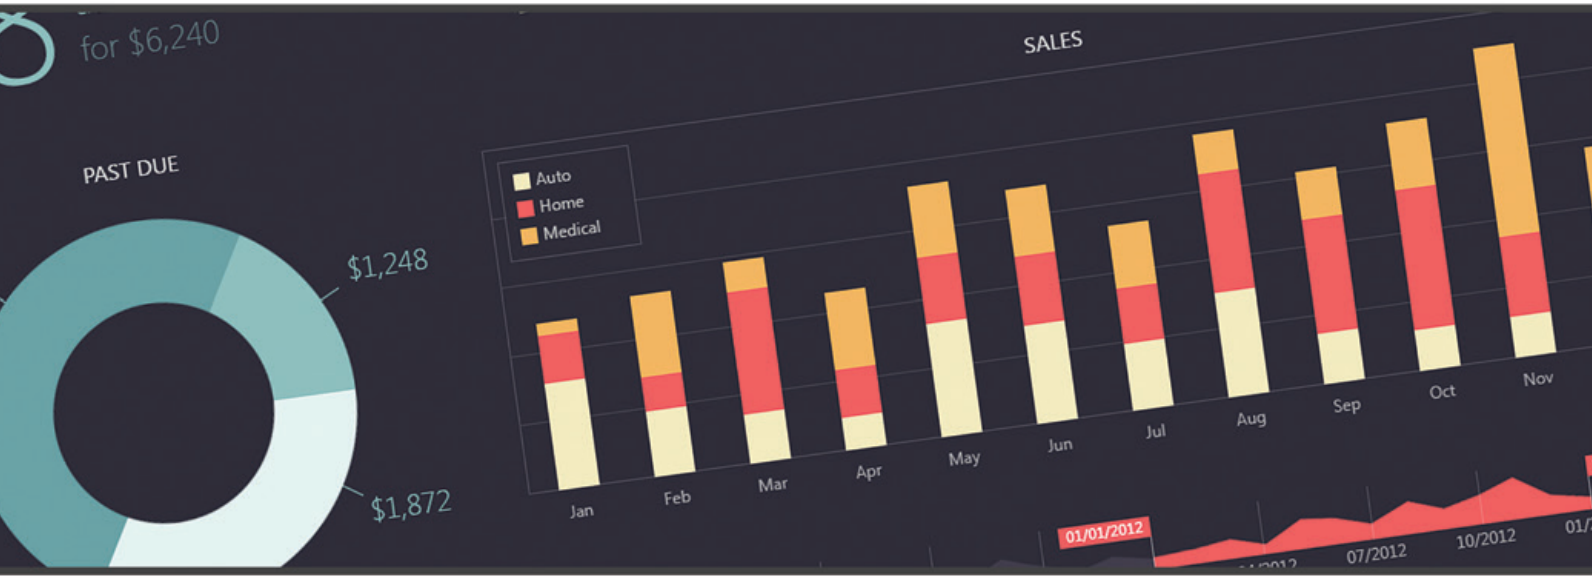
DevExpress™

Prices from 1.792,00 €

www.componentsource.com/devexpress-universal

Dashboards & Analytics

DevExpress Universal ships with everything you'll need to create information-rich decision support systems and to distribute your dashboard solutions royalty-free.



Your Next Great Dashboard Starts Here

Learn how you can create fully customizable Dashboards with our flexible data visualization tools.
componentsource.com/devexpress-universal

DevExpress®

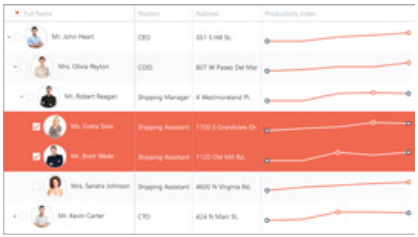
DevExtreme

Top 50 Product | #1 Publisher | Enterprise Partner

High-performance HTML5/JavaScript Widgets for next-generation app development.

Publisher: DevExpress | Category: Presentation Layer

Use your familiarity with JavaScript and the Visual Studio IDE to build store ready apps that run across iOS, Android, and Windows Phone. Includes grids, charts, treelist, maps, forms, scheduler and more.



Tree List

The DevExtreme Tree List is an intuitive and easy to use widget that combines the power of a traditional HTML5 Grid and a TreeView in a single UI element.

Charting

Transform data to its most concise and readable visual representation. All chart, gauge and range selector widgets can be composed into beautiful, informative dashboards that effectively convey intelligence at a single glance.

Mapping

DevExtreme provides interactive maps that can be customized by using different providers and data sources. It supports Google and Bing map providers, roadmap, satellite and hybrid views, customizable markers and routes.

DevExpress™

Prices from 407,00 €

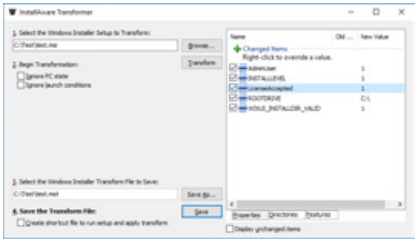
InstallAware Studio Admin

Top 100 Product | Top 50 Publisher | Enterprise Partner

A powerful Windows software installation solution with Web-based automation support.

Publisher: InstallAware | Category: Release Automation & Management

Provides the advantages of true Windows Installer rapid development productivity, plus repackaging support and a Web based Automation Interface.

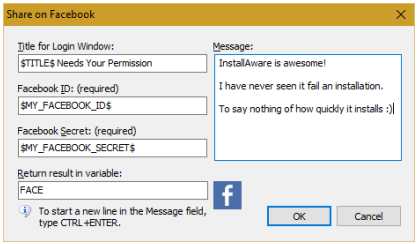


InstallAware Transformer

Give non-developers a point-and-click way to create MST transform files for any MSI setup. Any user may run through the setup, and instead of installing the package, InstallAware creates an MST transform file.

Latest Technology Support

InstallAware supports Windows 10 and Visual Studio 2017. Display installation progress on the Windows Taskbar, and pin apps to the new Windows 10 Start Menu Live Tiles.



Post to Social Networks

Query for social network credentials at any time while your setup is running on end-user systems. Tweet on Twitter and Share on Facebook, before continuing with your installation.

InstallAware

Prices from 3.257,00 €

www.componentsource.com/installaware-studio-admin

New **InstallAware X6 Creators Update** with Installation Tailoring, Unicode Setup Capture with Stackable Noise Filters, Automated Virtual Machine Unit Testing, 64-bit Compression, and an Open Source Desktop Bridge.

- Visually create MST Windows Installer transform files using the new InstallTailor InstallAware Transformer.
- Use the industry's fastest setup capture, fortified with three new stackable filters to eliminate capture noise.
- Run automated installation unit tests simultaneously on as many virtual machines as your hardware can handle.
- Reduce runtimes such as SQL Server Express to half of their already-compressed size with 64-bit compression.
- Cross Microsoft's Desktop Bridge toll-free to the Universal Windows Platform APPX Highway!

www.componentsource.com/installaware

InstallAware

InstallAware Studio

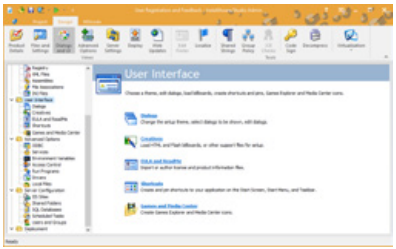
Top 50 Publisher

Enterprise Partner

A powerful software installation solution for deploying products, patches and updates.

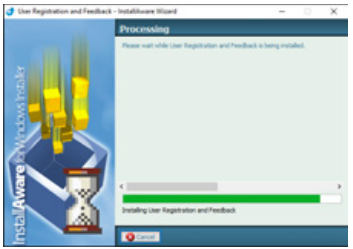
Publisher: InstallAware | Category: Release Automation & Management

Supports the latest technologies and provides the advantages of true Windows Installer rapid development productivity. Enables MSIcode scripting for rapid setup development without the steep learning curve of other setup solutions.



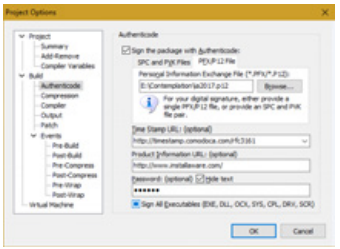
Easy MSI Customization

InstallAware setups don't have any dependencies or require scripting runtimes. It is possible to completely customize your setup even if you're unfamiliar with Windows Installer.



Faster, More Reliable Installs

Ships with a Native Code Setup Engine, a faster and more reliable alternative to Windows Installer. The Native Engine with InstantInstall Acceleration creates Windows Installers faster by an order of magnitude.



SHA 256 Code Signing

InstallAware applies a smart algorithm to determine whether files are going to be singly signed, doubly signed, or skipped. All signing happens automatically to comply with Microsoft's code signing standards.

InstallAware

Prices from 1.628,00 €

www.componentsource.com/installaware-studio

Only **InstallAware X6 Creators Update** Integrates with
Visual Studio 2012-2017, Building Desktop Bridge
(Windows Store)/WSA Installer (Nano Server)/Sideloading
APPX, App-V, MSI, and EXE Setups from a Single Toolbar Click.
> Target Windows Store submissions, Nano Server Installers, or Sideloading with the New APPX Builder 2.0.
> Build an APPX, App-V, MSI, or EXE with a single click on the InstallAware Visual Studio Extension Toolbar.
> Safely deploy the latest runtimes .NET Framework 4.7, SQL Server 2016 SP1, Visual C++ Runtimes 14.x/15.x.
> Leverage full-stack integration with Microsoft Team Foundation Server 2010-2017 and Visual Studio 2003-2017.
> Use the two-way synchronized InstallAware IDE to flesh out setups either visually or by MSIcode scripting.

TX Text Control .NET Server for ASP.NET

Top 100 Product | Top 25 Publisher | Enterprise Partner

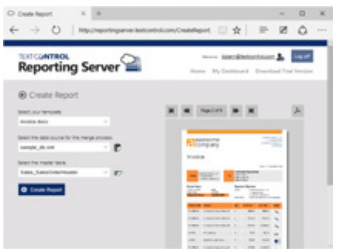
Powerful word processing & reporting for your Web Forms & MVC Web applications.

Publisher: Text Control | Category: Word Processing

Specifically designed to run in server side applications, TX Text Control .NET Server for ASP.NET is ideal for batch processing or printing large volumes of documents.

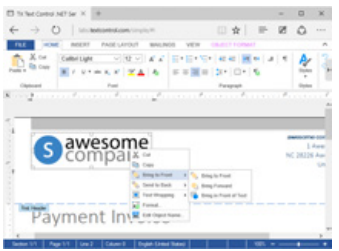
Document Conversion

Convert and modify different document types. Supports a wide range of word processing formats (RTF, DOC, DOCX, HTML, XML, PDF) and image file formats (GIF, PNG, JPG, BMP, WMF, EMF, TIF).



Automate MS Word Documents

Replacing MS Office Automation in applications is a typical use case for document APIs such as TX Text Control. Automate, edit and create documents using UI and non-UI components.



Cross-Browser Designer

A true WYSIWYG, HTML5-based Web editor & reporting template designer. Give your users an MS Word compatible editor to create powerful reporting templates anywhere, in any browser, on any device.

TEXT CONTROL

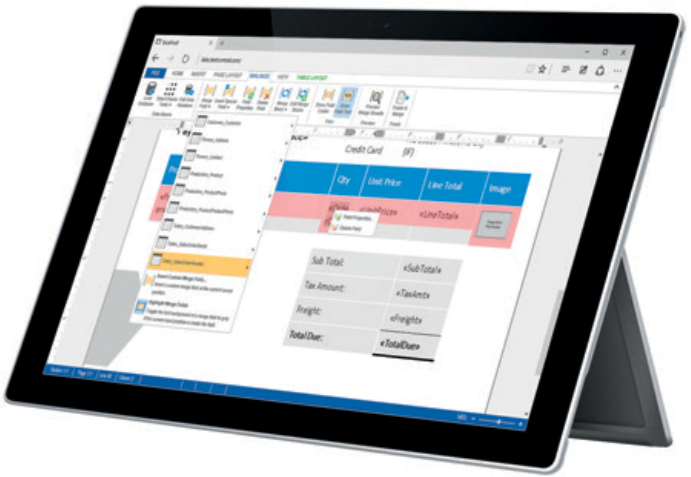
Prices from 2.878,00 €

www.componentsource.com/tx-text-control-net-server

ASP.NET MVC REPORTING

The first cross-browser, true WYSIWYG HTML5-based document editor.

Now with full ASP.NET MVC support.



Edit and create MS Word documents

Create and modify Adobe® PDF documents

Create reports and mail merge templates

Integrate with Microsoft® Visual Studio

```
PM> Install-Package TXTextControl.Web
```

Give your users an MS Word compatible editor to create powerful documents and reporting templates anywhere - in any browser. Feature-complete including mail merge, sections, headers and footers, drawings and shapes, tables, barcodes and charts.

Available for ASP.NET Web Forms and MVC.

TEXT CONTROL

TX Text Control .NET for Windows Forms

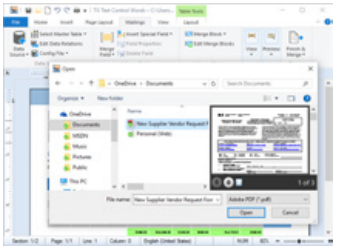
Top 25 Publisher

Enterprise Partner

Add Microsoft Word look and feel editing to your Windows Forms applications.

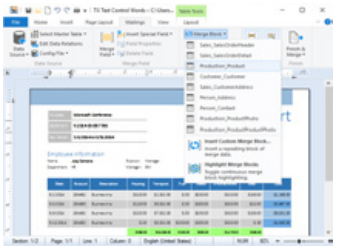
Publisher: Text Control | Category: Word Processing

TX Text Control .NET for Windows Forms is a royalty-free, fully programmable rich edit control that offers developers a broad range of word processing features in a reusable component for Visual Studio.



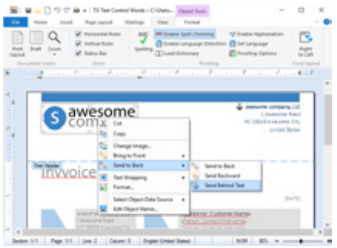
Import Adobe PDF Documents

Import PDF documents, and view, edit or convert them. Imported PDFs can be modified just like any other format. The fully featured API can be used to change the content or to search on the document.



Reporting and Mail Merge

Text Control combines the power of a programmable reporting tool and WYSIWYG word processor. Create mail merge and table reports, master-detail and sub-reports based on MS Word compatible report templates.



Word Compatible File Formats

Modify MS Word documents or create Adobe PDF documents from your application. Supports a range of word processing formats (RTF, DOC, DOCX, HTML, XML, PDF) and image formats (GIF, PNG, JPG, BMP, WMF, EMF, TIF).

TEXT CONTROL

Prices from 1.103,00 €

www.componentsource.com/tx-text-control-net-professional

ALL ABOUT DOCUMENTS

Text Control provides deep functionality components and consulting to integrate reporting and word processing into .NET Windows, Web and Mobile applications.

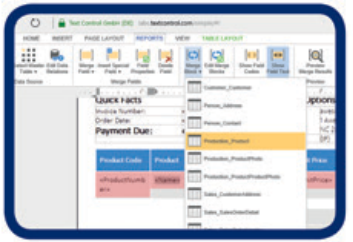
Visual Studio Partner

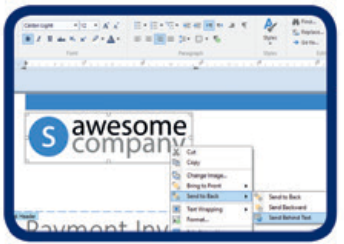
Software • Training • Consulting

Reporting and Mail Merge

The Text Control Reporting Framework combines powerful reporting features with an easy-to-use, MS Word compatible word processor for ASP.NET, WPF and Windows Forms. Users can create documents and templates using ordinary Microsoft Word skills.

TX Text Control is completely independent from MS Word or any other third-party application and can be completely integrated into your business application.





MS Word compatible Rich Text Editing

These feature-complete, fully programmable rich edit controls offer developers a broad range of word processing features in reusable UI and non-UI components for ASP.NET, WPF and Windows Forms.

They provide comprehensive text formatting, powerful mail merge features and all word processing key concepts such as table support, images, headers and footers, page sections and spell checking.

Load and Save Adobe PDFs

Using TX Text Control, Adobe PDF and PDF/A documents can be created including document access security settings and digital signatures.

PDF documents can be imported to be viewed, edited and converted. Edit PDF documents just like any other format such as DOC or DOCX. A fully featured API can be used to modify the content or to search through the document.

Janus GridEX for .NET

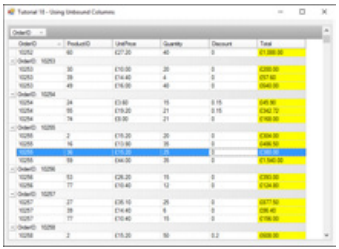
Top 25 Publisher

Corporate Partner

A data-aware, fully editable Outlook-style grid component.

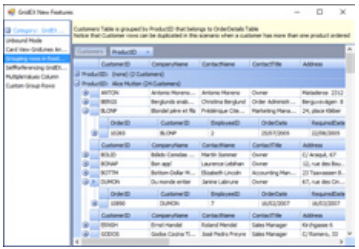
Publisher: Janus Systems | Category: Grids | ★★★★½

Janus GridEX for .NET implements its own data binding mechanism in order to perform sophisticated data manipulation. It also has an unbound mode for managing data in any format without sacrificing any group or sort capabilities.



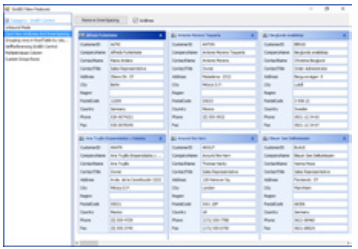
Hierarchical Data Display

Create effective Outlook-like user interfaces that display hierarchical data. The control allows you to display, edit, sort, group, filter, manipulate, summarize, preview and print your data.



Filtering

Define simple or complex conditions that can be used to filter, format or find rows which conform to the criteria. The control also presents a filter row which permits users to easily filter the data.



CardView

Janus GridEX for .NET CardView supports multicolumn layouts and the ability to expand or collapse cards. ColumnSets can also be used while the control is in CardView.

Nevron Vision for SSRS

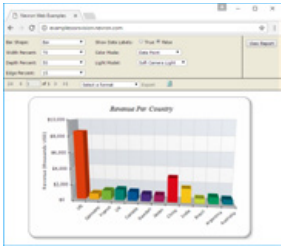
Top 100 Publisher

Corporate Partner

Advanced data visualization for more informative reports.

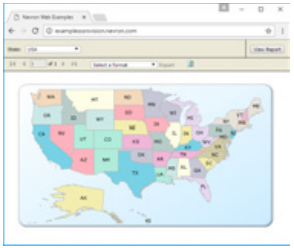
Publisher: Nevron | Category: Data Visualization | ★★★★★

Nevron Vision for SSRS delivers enhancements to your Reporting Services reports. It offers amazing data visualization features, performance and flexibility, directly within the native SSRS environment.



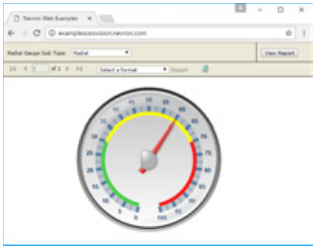
Nevron Chart for SSRS

Delivers a complete set of 2D and 3D chart types, customizable axes, data integration and visual effects to your reports. An indispensable tool for any Business Intelligence, scorecard or scientific report.



Nevron Map for SSRS

Provides report authors with an easy and powerful way to create choropleth and informative maps that are integrated with data. A perfect complement to any report that displays geographical data of any type.



Nevron Gauge for SSRS

Delivers a complete set of gauge types, highly customizable axes, tight data integration and unmatched visual effects to your reports. It includes linear gauges, state indicators and numeric displays.

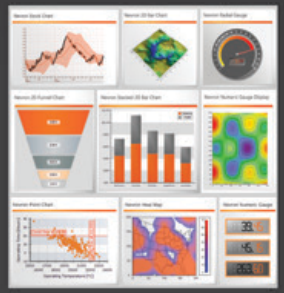
NEVRON

Prices from 807,00 €

www.componentsource.com/nevron-vision-for-ssrs

NEVRON

Nevron provides leading data visualization and UI controls for a diverse range of .NET centric platforms. Our controls and plugins integrate in desktop and web applications: WinForms, WPF, Silverlight, Xamarin, ASP.NET, SSRS, and Sharepoint.



Charts & Gauges

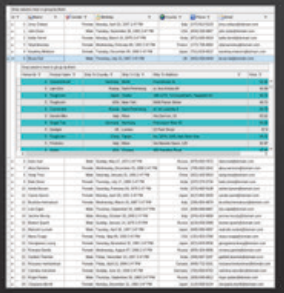
Our leading charting technology allows developers and IT professionals to create presentational, business, scientific, real-time monitoring, statistical, process control, BI, dashboards and other types of charts.
It includes features such as 2D/3D hardware acceleration, binding to a diverse range of data sources, advanced axes, numerous charting types and many more.

Diagrams

Industry leading diagramming components that can help you author and visualize complex flowcharts, org-charts, mind-maps, ERM, UML and other types of diagrams. Features include automatic layouts, interactive editing, routable connectors, groups, smart shapes, line jumps, Visio import, export to SVG and PDF and many more.

Text processing

Industry leading control for DOCX, RTF, PDF, HTML and EPUB document generation, editing and visualization. Our control allows you to create all types of text documents such as contracts, invoices, reports, and others. Suitable for advanced text processing, automated document generation, reporting, text document conversion, WYSIWYG text and HTML editing, proofreading and more.



Grids

High performance grid components for displaying, editing and analyzing tabular and hierarchical data. Features include binding to diverse data sources, grouping, filtering, sorting, master-details and advanced extensibility options.
