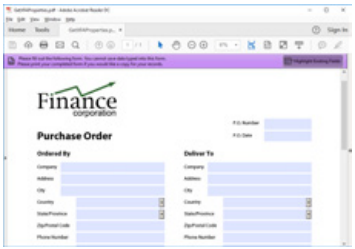
Aspose.Total for .NET

#5 Product | #3 Publisher | Enterprise Partner

Open, create, convert, print & save files from within your own applications.

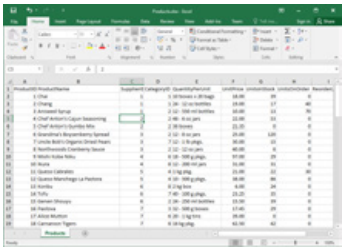
Publisher: Aspose | Category: Document & Text Processing | ★★★★★

Aspose.Total for .NET is a compilation of every .NET component offered by Aspose. It allows you to create a wide range of applications that work with file formats from Excel, Word, PowerPoint, Project, OneNote, Outlook, Visio and PDF.



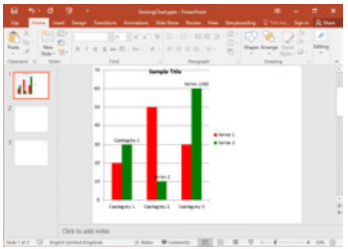
Aspose.Pdf for .NET

Includes a set of APIs for PDF document creation and manipulation, without using Adobe Acrobat. You can also transform each page of a PDF into conventional image formats such as BMP, JPEG, PNG and GIF.



Aspose.Cells for .NET

Create, read, edit, convert, protect or print Excel spreadsheets including more than 10 file formats without installing Microsoft Excel. Includes a combination of APIs and GUI controls.



Aspose.Slides for .NET

Enables any .NET application to read, write, modify and convert PowerPoint documents, without the need for Microsoft PowerPoint. It can render presentation slides to PDF, XPS, HTML, Images and PDF Notes.

ASPOSE File Format APIs

Prices from $ 2,939.02

www.componentsource.com/aspose-total-net

File Format APIs

Open, Create, Convert, Print and Save files from your applications!

ASPOSE
File Format APIs

Aspose.Total

Enable your applications to manipulate Word, Excel, PDF, PowerPoint, Outlook and more than 100 other file formats for all major platforms.

Aspose.Words

Create, edit, convert or print Word documents (DOC, DOCX, RTF...)

Aspose.Cells

Create, Edit or Convert Excel worksheets (XLS, XLSX, ODS...)

Aspose.Pdf

Manipulate PDF file formats (PDF, PDF/A, XPS...)

Aspose.Slides

Create, edit or convert PowerPoint presentations (PPT, PPTX, ODP...)

Aspose.Email

Manipulate Email file formats (MSG, PST, EML...) and popular network protocols (Exchange, SMTP, IMAP...)

Aspose.BarCode

Generate or recognize barcodes (Code128, PDF417, Postnet...)

Aspose.Imaging · Aspose.Tasks · Aspose.OCR · Aspose.Diagram · Aspose.Note · Aspose.3D

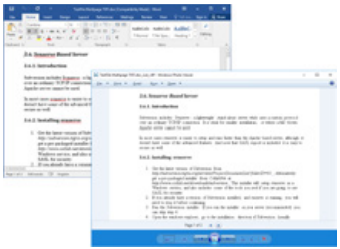
Aspose.Words for .NET

Top 25 Product | #3 Publisher | Enterprise Partner

Advanced .NET APIs to manipulate word processing documents.

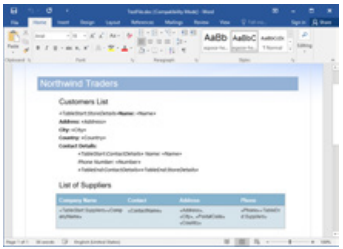
Publisher: Aspose | Category: Word Processing | ★★★★★

Perform a wide range of document processing tasks directly within your .NET applications, without using Microsoft Word. Supports DOC, OOXML, RTF, HTML, OpenDocument, PDF, XPS, EPUB and many other formats.



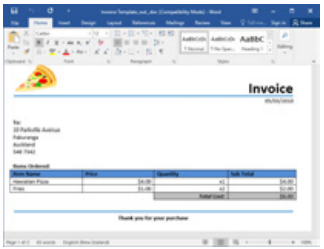
Render, Print & View Documents

Print or convert whole documents or even individual pages from Word documents to TIFF, PNG, BMP, JPEG, SVG or EMF images. You can also render (draw) any document page onto a .NET Graphic object.



Advanced Document Processing

You can insert formatted text, images, tables and other content into a document. You can also combine documents, move sections between documents, and add images stored outside of the database.



Reporting and Mail Merge

Design reports in Microsoft Word and then use Aspose.Words to populate documents with data from a number of sources. You can also perform complex operations including inserting images and repeatable regions.

ASPOSE File Format APIs

Prices from $ 979.02

www.componentsource.com/aspose-words-net

Manipulating Documents?

GROUPDOCS
Document Manipulation APIs

APIs to view, convert, annotate, compare, sign, assemble and search documents in your applications.

GroupDocs.Viewer

Boost your document viewing process to view over 50 documents and image formats in any application without any external viewers using document viewer APIs.

GroupDocs.Conversion

Enhance your productivity and streamline workflows with fast batch document conversion APIs in any .NET, Java or Cloud application.

GroupDocs.Signature

Add the power of electronic signatures in your applications with e-Signature APIs. Digitally sign Microsoft Word, Excel, PowerPoint and PDF documents.

GroupDocs.Annotation

Manage interactive and explanatory annotations to specific words, phrases and regions of the documents content in any cross platform application.

GroupDocs.Comparison

Get a difference summary report by comparing two versions of the same document using the file comparison API in any cross platform application.

GroupDocs.Assembly

Boost your document generation process with cross platform automation assembly APIs. Generate multi format documents from templates on the fly.

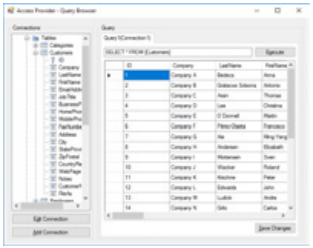
CData ADO.NET Subscription

Comprehensive access to data from ADO.NET.

Top 50 Publisher | Enterprise Partner

Publisher: CData Software | Category: Data Access

Real-time data integration from 80+ SaaS, NoSQL, and Big Data sources. Includes a single SQL interface to data that insulates users from the challenges and complexities of integrating with individual APIs, SDKs, and services.

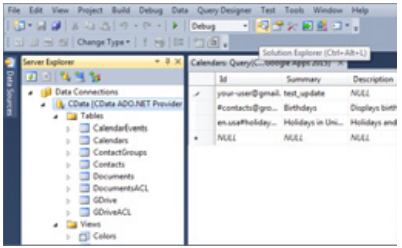


Access Data from any .NET App

Use objects to connect to data just as you would any traditional database, through the Visual Studio Server Explorer, in code, and in data controls like DataGridView, GridView and DataSet.

Connect .NET Apps to Data

Comprehensive access to application, database, and Web API data through easy-to-use tools. Whether you are building Desktop, Web, or Mobile apps you can use the drivers for fast and secure access to data.



Visual Studio Integration

The ADO.NET Data Providers can be used to access and explore data directly from the Visual Studio Server Explorer. These constructs return live data that you can work with directly from within Visual Studio.

Prices from $ 979.02

www.componentsource.com/cdata-ado-net-subscription

CData Excel Add-In Subscription

Top 50 Publisher

Enterprise Partner

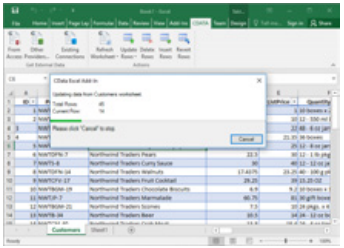
Access to applications, databases, and Web APIs directly from Excel Worksheets.

Publisher: CData Software | Category: Data Access Infrastructure

CData Excel Add-In Subscription gives Excel users unlimited access to real-time data from an extensive list of applications, databases, and SaaS sources. From Big Data and NoSQL databases, to CRM, ERP, and Accounting systems.

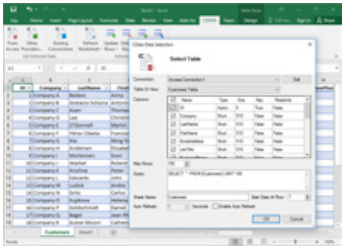
Included Data Sources

CData Excel Add-In Subscription includes 75+ data sources including Amazon DynamoDB, Authorize.Net, Facebook, Google AdWords, Microsoft Access, MySQL, Office 365, PayPal, QuickBooks and Xero Accounting.



Bi-Directional Access

Perfect for mass imports/exports/updates, data cleansing and Excel based data analysis. You can also modify and delete records, quickly export and backup data, and work on data with charts and pivot tables.



Easily Connect to Data

Users simply supply their credentials to create a connection and can immediately begin working with live data. The Excel Add-In is completely self-contained; no additional software installation is required.

Prices from $ 293.02

www.componentsource.com/cdata-excel-add-in-subscription

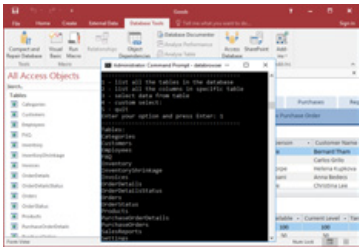
CData ODBC Driver Subscription

Connecting to data has never been easier.

Top 50 Publisher | Enterprise Partner

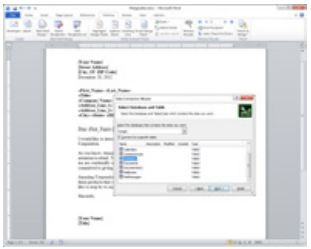
Publisher: CData Software | Category: Data Access

CData ODBC Driver Subscription gives you access to live SaaS Apps, NoSQL, and Big Data from desktop clients through standard ODBC connectivity.



Connect to Live Data

The drivers include a library of 50+ functions, including String, Date and Numeric that can manipulate column values into the desired result. Popular examples include Regex, JSON, and XML processing functions.



Connect from Office Tools

Any application that can access data through ODBC, like Microsoft Excel, PowerPivot, or Word, can leverage the ODBC Drivers to connect to real-time data and help you with powerful capabilities like Mail Merge.

Read & Write Data Through ODBC

CData ODBC Driver Subscription includes 75+ data sources including Apache HBase, Azure Table, Gmail, Google Sheets, MailChimp, Microsoft Dynamics, SharePoint, SQLite, Sugar CRM, and YouTube Analytics.

Prices from $ 391.02

www.componentsource.com/cdata-odbc-driver-subscription

CData PowerShell Cmdlet Subscription

Top 50 Publisher

Enterprise Partner

Access data directly from the PowerShell command-line.

Publisher: CData Software | Category: Data Access Infrastructure

The PowerShell Subscription offers straightforward access to live data from popular NoSQL & Big Data databases, CRM, ERP, Accounting Systems, Marketing Automation, cloud platforms, and more.

PowerShell Data Integration

Comprehensive access to application, database, and Web API data through familiar tools. The included Cmdlets enable PowerShell users to quickly and easily work with live data from virtually anywhere.

Clean & Normalize Data

Use PowerShell scripting to normalize and/or de-duplicate data or pipe data from various sources into flat-files, databases, and other data stores for archival, back-up and synchronization purposes.

Real-time Access to Data

The Cmdlets offer a simple Transact-SQL interface for connecting with data, in a virtually identical way to how a user would interact with a relational database from PowerShell.

Prices from $ 391.02

www.componentsource.com/cdata-powershell-cmdlet-subscription

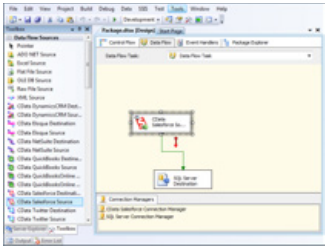
CData SSIS Component Subscription

Top 50 Publisher | Enterprise Partner

Easily connect SSIS Workflows to applications, databases and Web APIs.

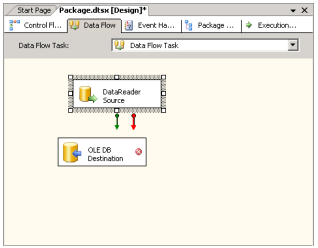
Publisher: CData Software | Category: Data Access Infrastructure

CData SSIS Component Subscription provides an easier and faster way to connect SQL Server with data. It offers straightforward access to NoSQL, Big Data, and SaaS Service data through standard SSIS Workflows.



SQL Server Integration

Use CData Data Flow Tasks to connect SQL Server with data without expensive custom integration or application development. Includes full Create, Read, Update, and Delete (CRUD) support.



Connect SQL Server with Data

The SSIS Subscription offers access to all CData SSIS Components, providing SSIS Workflows with access to applications, databases and Web APIs, in minutes, through SQL Server Integration Services.

Included Data Sources

Integration with 80+ SaaS, NoSQL, & Big Data sources including Amazon SimpleDB, FreshBooks Accounting, Google Apps, Microsoft Dynamics, Office 365, QuickBooks, Salesforce & Force.com and Sugar CRM.

cdata

Prices from $ 783.02

www.componentsource.com/cdata-ssis-component-subscription

Work With Relational Data, Not Complex APIs or Services

Whether you are a developer building Apps with ADO.NET, JDBC, OData, or Xamarin, or a systems integrator connecting systems with SQL SSIS or BizTalk, or even an information worker using ODBC or Excel — our state-of-the-art drivers give you live and direct access to any data source. Get simple, standard SQL access to Salesforce, Microsoft Dynamics, MongoDB, BigQuery, Cassandra, SAP, NetSuite, Google Analytics, SharePoint, and much more.

DevExpress®

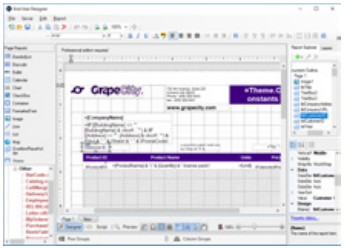
ActiveReports

#3 Product | #2 Publisher | Enterprise Partner

A flexible and extensible platform for all your reporting needs.

Publisher: GrapeCity | Category: Reporting

Design, customize, publish, and view data in your business applications. Create everything from simple invoices to complex statistical data visualizations and you can even enable your end users to design reports for themselves.



Reporting for End Users

End users always ask for tweaks in standard reports. Give them the power to make the changes themselves with a fully customizable set of designer controls including a drag and drop report designer.

Report Types for Every Need

ActiveReports helps developers design accounting, analytical, budget, risk analysis, scientific, calendar, scorecard, insurance, healthcare, clinical, stock analysis, and other business reports for their apps.

Dynamic Reports

You can control report behavior either by using events or by designing dynamic reports entirely in code. You can also use property expressions to change the run-time behavior of controls in RDL & Page reports.

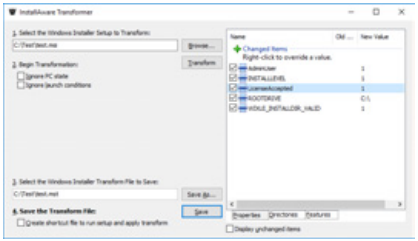
InstallAware Studio Admin

Top 100 Product | Top 50 Publisher | Enterprise Partner

A powerful software installation solution with a Web-based automation interface.

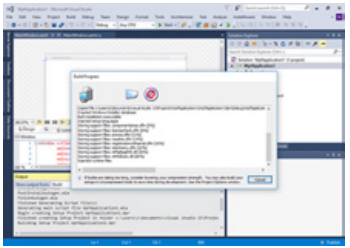
Publisher: InstallAware | Category: Release Automation & Management

InstallAware Studio Admin is a software installation solution for Windows that provides you with the advantages of true rapid-Windows Installer development productivity.



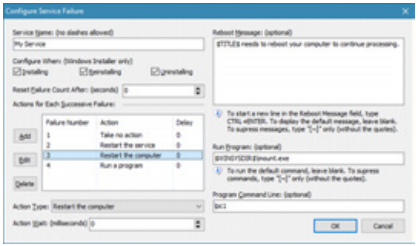
InstallAware Transformer

Give non-developers a point-and-click way to create MST transform files for any MSI setup. Any user may run through the setup, and instead of installing the package, InstallAware creates an MST transform file.



Extension for Visual Studio

Want to build a Win32/Win64/.NET app as an APPX package so you can bridge it to the Universal Windows Platform via Microsoft's Desktop Bridge? Click once and you are ready for submission to the Windows Store.



Advanced Service Configuration

Windows Service Configuration parameters come in handy when proofing your target deployments against failures. Includes setting the time delay of an auto-start service, to choosing when to run failure actions.

InstallAware

Prices from $ 3,919.02

www.componentsource.com/installaware-studio-admin

New **InstallAware X6** with Installation Tailoring,
Advanced Service Configuration with Failure Actions,
Unicode Setup Capture with Stackable Noise Filters,
and an Open Source Desktop Bridge.
› Visually create MST Windows Installer transform files using the new InstallAware Transformer
› Configure advanced Windows Service properties and set custom failure actions for each sequential failure
› Use the industry's fastest setup capture, now fortified with new, stackable filters to eliminate capture noise
› Lock script variable values from the command line, accelerate Windows Installer setup performance
› Cross Microsoft's Desktop Bridge toll-free to the Universal Windows Platform APPX Highway!
www.componentsource.com/installaware
InstallAware

InstallAware Developer

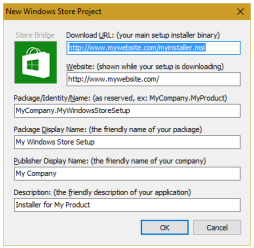
Top 50 Publisher

Enterprise Partner

A fast and scalable way to deliver ultra-rich, ultra-fast Windows installations.

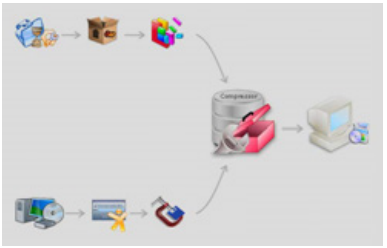
Publisher: InstallAware | Category: Release Automation & Management

InstallAware Developer enables MSIcode scripting for rapid setup development without the high cost and steep learning curve of other setup solutions.



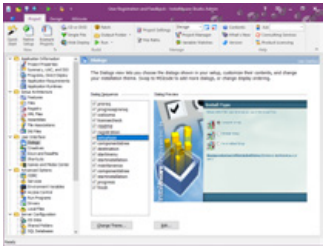
Windows Store Apps

Getting your existing Win32, Win64, and .NET apps to the Windows Store is easy. The included Universal Windows app template is easily customized, and creates a ready-to-submit project in seconds.



Superior 64-bit Compression

InstallAware's 64-bit compression engine provides extremely high rates of compression. For example, Microsoft SQL Server runtimes are reduced a further 50% beyond Microsoft's already compressed sizes.



Hybrid Installation Technology

Switch between Windows Installer and Native Code setup engines at runtime, at will, as often as you need. Best of all, it takes just one line of code to enter and exit Native Engine mode.

InstallAware

Prices from $ 979.02

www.componentsource.com/installaware-developer

Only **InstallAware X6** Integrates with Visual Studio 2017, Building Desktop Bridge APPX/Universal Windows Platform, App-V Virtualization, and MSI Windows Installer Packages from a Single Click on the InstallAware Extension Toolbar

- New InstallAware X6 Visual Studio Extensions integrate with all Visual Studio versions - 2003 through 2017
- Click on the InstallAware Extension Toolbar buttons to build MSI, APPX, or even App-V packages for your projects
- Detect and deploy the latest application frameworks, including Microsoft .NET 4.6.2, and MFC 14.10
- Integrate with Team Foundation Server versions 2010 through 2017 for seamless team collaboration
- Reduce runtimes such as Microsoft SQL Server 2016 Express with SP1 to half of its eady-compressed size!

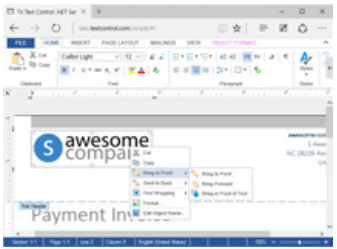
TX Text Control .NET Server for ASP.NET

Top 100 Product | Top 25 Publisher | Enterprise Partner

Powerful word processing & reporting for your Web Forms & MVC Web applications.

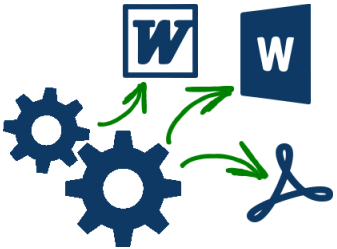
Publisher: Text Control | Category: Word Processing

Specifically designed to run in server side applications, TX Text Control .NET Server for ASP.NET is ideal for batch processing or printing large volumes of documents.



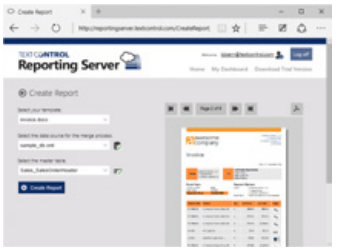
Cross-Browser Document Editing

Includes a true WYSIWYG, HTML5-based Web editor and reporting template designer. Give your users an MS Word compatible editor to create powerful reporting templates anywhere - in any browser on any device.



Document Conversion

Convert and modify different document types. Supports a wide range of word processing formats (RTF, DOC, DOCX, HTML, XML, PDF) and image file formats (GIF, PNG, JPG, BMP, WMF, EMF, TIF).



Automate Your Word Documents

Using TX Text Control you can automate, edit and create documents using UI and non-UI components, all without Microsoft Office Automation. It also gives you access to flow type layout reporting features.

TEXT CONTROL

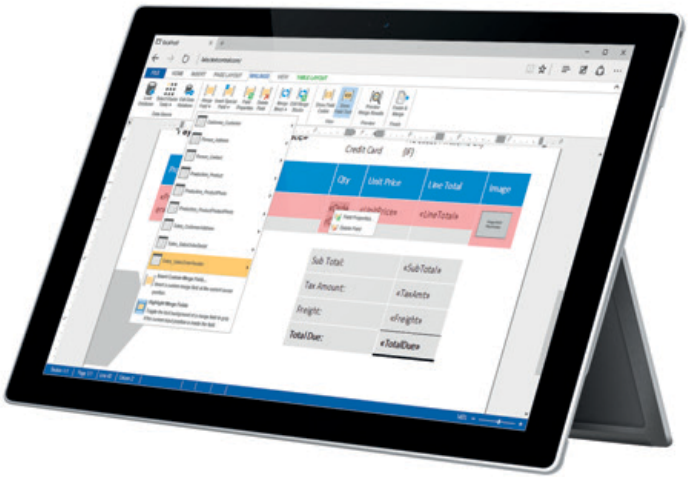
Prices from $ 2,938.04

www.componentsource.com/tx-text-control-net-server

ASP.NET MVC REPORTING

The first cross-browser, true WYSIWYG HTML5-based document editor.

Now with full ASP.NET MVC support.



Edit and create MS Word documents

Create and modify Adobe® PDF documents

Create reports and mail merge templates

Integrate with Microsoft® Visual Studio

```
PM> Install-Package TXTextControl.Web
```

Give your users an MS Word compatible editor to create powerful documents and reporting templates anywhere - in any browser. Feature-complete including mail merge, sections, headers and footers, drawings and shapes, tables, barcodes and charts.

Available for ASP.NET Web Forms and MVC.

TEXT CONTROL

Text Control ReportingCloud

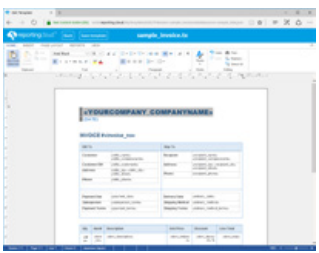
Top 25 Publisher

Enterprise Partner

Web API reporting platform to create MS Word compatible reports in the cloud.

Publisher: Text Control | Category: Cloud Services

Use the Text Control ReportingCloud Web API to merge MS Word compatible templates with JSON data from all clients such as .NET, Javascript, PHP, Node.JS, jQuery, Python, Android, Java, iOS and many more.



Design Your Template

Create customized invoices, contracts and quotes directly using the WYSIWYG online template designer.

Merge With Data

Using simple HTTP requests, merge fields and repeating blocks in templates can be merged with hierarchical JSON data from within your application.

Retrieve Created Document

The merged templates are returned as Adobe PDF, MS Word and HTML format and you can use them immediately in your application.

TEXT CONTROL

Prices from $ 341.04

www.componentsource.com/text-control-reportingcloud

ALL ABOUT DOCUMENTS

Text Control provides deep functionality components and consulting to integrate reporting and word processing into .NET Windows, web and mobile applications.

Visual Studio Partner

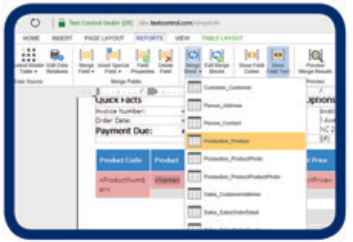
HTML5

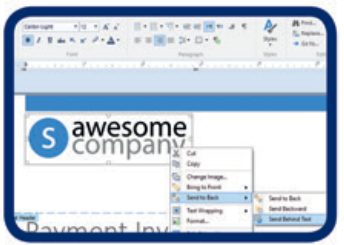
Software • Training • Consulting

Reporting and Mail Merge

The Text Control Reporting Framework combines powerful reporting features with an easy-to-use, MS Word compatible word processor for ASP.NET, WPF and Windows Forms. Users can create documents and templates using ordinary Microsoft Word skills.

TX Text Control is completely independent from MS Word or any other third-party application and can be completely integrated into your business application.





MS Word compatible Rich Text Editing

These feature-complete, fully programmable rich edit controls offer developers a broad range of word processing features in reusable UI and non-UI components for ASP.NET, WPF and Windows Forms.

They provide comprehensive text formatting, powerful mail merge features and all word processing key concepts such as table support, images, headers and footers, page sections and spell checking.

Load and Save Adobe PDFs

Using TX Text Control, Adobe PDF and PDF/A documents can be created including document access security settings and digital signatures.

PDF documents can be imported to be viewed, edited and converted. Edit PDF documents just like any other format such as DOC or DOCX. A fully featured API can be used to modify the content or to search through the document.

TEXT CONTROL

Actipro SyntaxEditor for Winforms

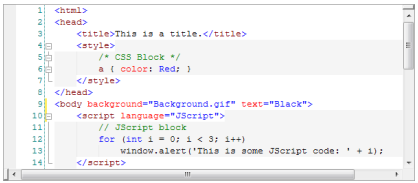
Top 50 Publisher

Corporate Partner

A syntax-highlighting code editor control and parsing suite.

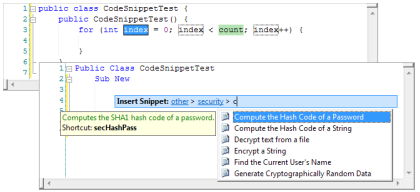
Publisher: Actipro Software | Category: Code Editing & Syntax | ★★★★★

SyntaxEditor is a powerful text editing control that is packed with features for efficient code editing, including syntax highlighting, code outlining, parsing, line numbers, block selection, IntelliPrompt UI and split views.



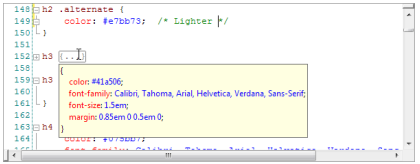
Syntax Highlighting

Over 100 edit actions are included with SyntaxEditor that cover everything from basic caret movement and selection, to features such as tabification, character/word/line transposition, etc.



Code Snippets

A code snippet is a fragment of code or text that you can store in a Visual Studio-compatible XML file and reuse at a later time. When a code snippet is activated, it inserts its text into SyntaxEditor.



Code Outlining (Folding)

Syntax languages can automatically choose where to create outlining nodes (based on tokens, AST's, etc.) or the end user can choose to create outlining nodes via selected text.

Janus GridEX for .NET

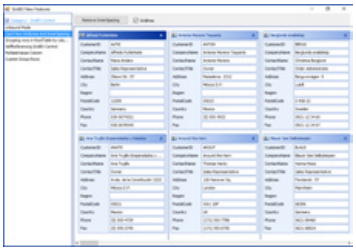
Top 25 Publisher

Corporate Partner

A data-aware, fully editable Outlook-style grid component.

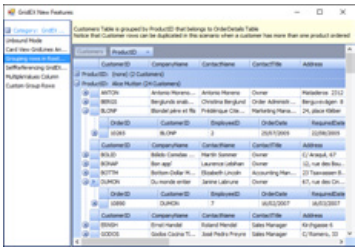
Publisher: Janus Systems | Category: Grids | ★★★★½

Janus GridEX implements its own data binding mechanism in order to perform sophisticated data manipulation. It also has an unbound mode for managing data in any format without sacrificing any group or sort capabilities.



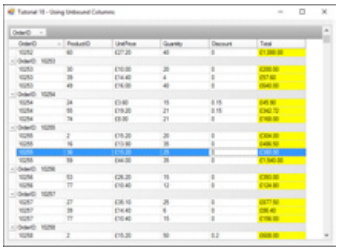
CardView

Janus GridEX for .NET CardView supports multicolumn layouts and the ability to expand or collapse cards. ColumnSets can also be used while the control is in CardView.



Filtering

Define simple or complex conditions that can be used to filter, format or find rows which conform to the criteria. The control also presents a filter row which permits users to easily filter the data.



Hierarchical Data Display

Create effective Outlook-like user interfaces that display hierarchical data. The control allows you to display, edit, sort, group, filter, manipulate, summarize, preview and print your data.

Prices from $ 489.00

www.componentsource.com/janus-gridex-net

Janus WinForms Controls Suite v4

Add powerful Outlook style interfaces to your applications

Janus WinForms Controls Suite enhances your applications with a powerful user interface that features the familiar Outlook visual style. All controls are 100% .NET managed code, 64-bit compatible and support Visual Studio and .NET Framework Client Profiles.

Janus WinForms Controls Suite includes sample applications that let you quickly add Outlook look and feel to your applications.

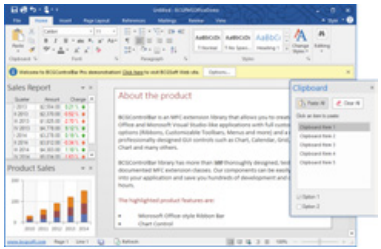
BCGControlBar Library Professional Edition MFC

Top 50 Product | Top 25 Publisher | Professional Partner

Create Microsoft Office and Microsoft Visual Studio-like applications.

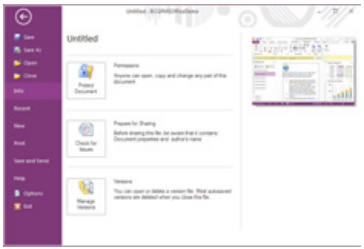
Publisher: BCGSoft | Category: UI & Interaction

Includes a rich set of GUI controls such as Chart, Calendar, Grid, Editor and Gantt. BCGControlBar Library has over 500 thoroughly designed, tested and fully documented MFC extension classes that will save you hundreds of development hours.



Ribbon Control

The Ribbon control replaces traditional toolbars and menus with tabbed groups (known as categories). Each tab is logically split into panels and each panel may contain various controls or command buttons.



Office Look & Feel

BCGControlBar Library provides a Microsoft Office look and feel. This is a skinned interface that can be applied to the various sets of controls such as ribbons, menus, toolbars, docking panes and more.

Chart Control

Create 2D and 3D charts with an unlimited number of series and unlimited data points. You can customize data markers and data labels, and data point values can be modified on the fly for real-time charting.

BCGSoft

Prices from $ 783.02

www.componentsource.com/bcgcontrolbar-library-professional

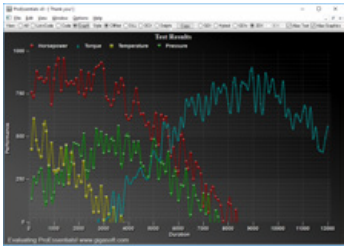
ProEssentials

Top 100 Product | Top 100 Publisher | Author

Add financial, scientific, engineering and business charts to your applications.

Publisher: GigaSoft | Category: Charts | ★★★★★

ProEssentials is ideal for realtime or continuous running chart implementations and includes a robust feature set, quality rendering, and simple implementation and distribution.



Scientific Graph

Pass large amounts of data into the graph and easily view the information in smaller/clearer increments via zooming or dialog adjustments. Zooming can be invoked by left-button dragging a zoom box.

Graph Types

Includes many differnet chart types: Line, Bar, Point/Scatter, Area, Points plus Best-Fit-Curve, Spline, High-Low Line, High-Low Bar, High-Low-Close, Open-High-Low-Close, Box Plot/ Candlestick, Bubble and Step.

Graph Annotations

Annotations allow for mixing text and symbols in a tabular fashion within the chart or boundary of a chart. Table annotations can contain header columns and rows, hot spots, and real-time updating.

GigaSoft

Prices from $ 3,135.02

www.componentsource.com/proessentials

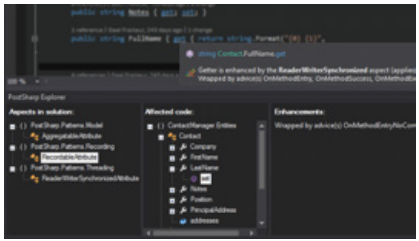
PostSharp Ultimate

Top 100 Publisher | Author

Add design patterns and thread safety to C# and VB.

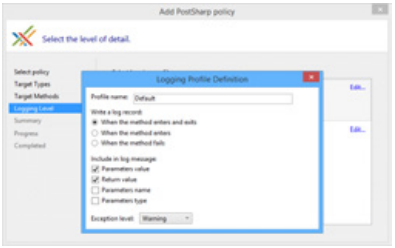
Publisher: PostSharp Technologies | Category: Coding & Debugging

Allows developers to eradicate boilerplate code by offloading repetitive work from humans to machines. It contains ready-made implementations of most common patterns and gives you the tools to build your own patterns.



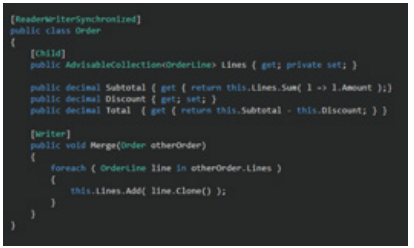
Add Patterns to C# and VB

PostSharp extends C# and VB with the notion of patterns. The result is cleaner code that is easier to write and understand, contains fewer defects and is less expensive to maintain.



High Performance Logging

Add comprehensive logging to your app without any impact on the code. Log entries contain the values of all input parameters and return values adding valuable information for maintenance and support work.



```
[ReaderWriterSynchronized]
public class Order
{
    [Child]
    public AdvisableCollection<OrderLine> Lines { get; private set; }

    public decimal Subtotal { get { return this.Lines.Sum( l => l.Amount );}
    public decimal Discount { get; set; }
    public decimal Total  { get { return this.Subtotal - this.Discount; } }

    [Writer]
    public void Merge(Order otherOrder)
    {
        foreach ( OrderLine line in otherOrder.Lines )
        {
            this.Lines.Add( line.Clone() );
        }
    }
}
```

Thread Safety

Starting new threads and tasks in .NET languages is simple, but ensuring that objects are thread-safe is not. Choose the threading models that you want and have built-in verification detect errors in your code.
