Lookup data from lists on the same site	✓		✓	✓
Lookup data from the same list	✓	✓	✓	✓
Single and multiple lookup	✓	✓	✓	✓
Parent-child relationships				✓
Support lookup data from subfolders		✓	✓	✓
Picker Dialog for searching items in lookup lists		✓	✓	
Filtering retrieved data using existing list views		✓	✓	✓
Supported default values		✓	✓	✓
Adding lookup items via New Item form on the fly			✓	✓
Adding lookup items via inline entering on the fly			✓	
Editing lookup items via Edit Item form on the fly			✓	✓
Excluding own item from lookup list during item editing		✓		
Checking whether hierarchical data is non-cyclic		✓		

Conversion among "ArtfulBits Cascaded Lookup", "ArtfulBits Cross-Site Lookup", "ArtfulBits Parent Selector" columns and standard SharePoint "Lookup" column

How to Use

To use Cascaded Lookup column you should select appropriate option in the list of available columns on the Create Column page. Change default settings on Cascaded Lookup Special Settings section in order to adjust column to your needs.

Cascaded Lookup Special Settings
Specify special Cascaded Lookup options.

Get information from the following site:
Cascaded Lookup Demo

Get information from the following source list:
Cities

Display the following column:
City

Parent column for cascaded lookup:
State

Filter by following column in source list:
State

☐ Allow multiple values

☐ Use filter by list view

Allow adding of items to the source list (referenced list information is getting from):

☐ None

☒ Item is added using separate list New Form (display 'Add new item' link)

Link caption:
Add City

Cascaded Lookup settings:

- Source site and list to get information from
- Display column (from source list) and values to be displayed
- Parent Column (not required) for cascaded lookup (in current list) that triggers a change for this Cascaded Lookup column. If column is not provided, default Cross-Site Lookup column behavior will be applied (no cascading). Lookup, Person or Group, Choice, Single line of text, Yes/No column is available as parent column
- Filter Column (located in source list) that provides filtering mechanism for this Cascaded Lookup Column. Lookup, Person or Group, Choice, Single line of text, Yes/No column is available as filter column
- "Allow multiple values" property allows multiple selections for Cascaded Lookup column
- "Use filtering by list view" option applies additional filter for proposed items in cascaded lookup (only items from the selected view could be presented in Cascaded Lookup field)

Example: there are two SharePoint lists: USA States (contains State column) and Cities (City, State column). You have third list (Customers) and need to add State and City column with parent-child relationships. In this case you should

add State column (it can be standard SharePoint Lookup, ArtfulBits Cross-Site Lookup or ArtfulBits Cascaded Lookup). Add City column (ArtfulBits Cascaded Lookup) with parent-child relationships after that. Do following:

- In “Get information from the following site” drop-down list, select site that contains Cities list
- In “Get information from the following list”, select Cities list
- In “Display the following column”, select City column in Cities list
- In “Parent column for cascaded lookup”, select State column of current list
- In “Filter by following column in source list”, select State column from USA States list

After that State column value changing triggers a change of City column in customer’s list.

Enabling “Item is added using separate list New Form” property allows adding items to source list on the fly:

Country	Canada
State	Ontario
City	(None)
	Add City

Document Library can be selected as lookup source list. In that case ArtfulBits Cascaded Lookup allows to lookup to subfolders. Checking “Use filter by subfolder” allows selecting exact folder from which data will be got. “Show the following items” section specifies which items (and/or folder) will be shown in selection drop-down.

Get information from the following site:	Cascaded Lookup Demo
Get information from the following source list:	Documents
Display the following column:	Title
Parent column for cascaded lookup:	(None)
Filter by following column in source list:	(None)
☐ Allow multiple values	
☐ Use filter by list view	
☒ Use filter by subfolder	Public Documents > Regulatory Acts
Show the following items	
☐ Items and Folders	
☐ Items and Folders (recursively)	
☐ Items Only	
☒ Items Only (recursively)	
☐ Folders Only	
☐ Folders Only (recursively)	

Release Notes

Version	Notes
v2.4 (March 28, 2016)	New Features: Added SharePoint 2016 Support
v2.3 (February 29, 2016)	New Features: - Added datasheet edit for SharePoint 2013 - Added JSLink support for SharePoint 2013
v2.1 (December 02, 2014)	New Features: - Add all/Remove all" functionality added to item multi picker Bugs Fixed: - Fixed compatibility issue with SharePoint 2013
v2.0 (April 29, 2013)	New Features: - Added SharePoint 2013 support - Added Russian and German localization
v1.48 (April 26, 2012)	Improvements: Improved adding and editing of the source list items on-the-fly
v1.47 (March 27, 2012)	Improvements: Improved performance
v1.46 (February 2, 2012)	Bugs Fixed: Fixed cross-site lookup data display in list view web part
v1.45 (January 26, 2012)	Improvements: Added filtering support by Content Type column
v1.44 (October 14, 2011)	Bugs Fixed: Fixed column required option
v1.43 (September 07, 2011)	Improvements: Added support of Managed Metadata column as Parent column
v1.42 (August 29, 2011)	Bugs Fixed: Fixed cascading lookup behavior in page layouts
v1.41 (August 08, 2011)	Bugs Fixed: Fixed column value if (None) is selected
v1.4 (June 01, 2011)	New Features: Added default values support

	Improvements: - Added support for new licensing model (ArtfulBits License Manager v1.4) - Added "Save site as template" support - Improved behavior with multilevel parent-child relationships, when Cascaded Lookup columns reference data from the same list
v1.37 (March 24, 2011)	Improvements: Removed duplicated values
v1.36 (March 19, 2011)	Bugs Fixed: Fixed field available values refreshing in multilevel parent-child relationships
v1.35 (March 12, 2011)	Bugs Fixed: - Fixed cascading lookup behavior when parent column has lookup type and is required - Fixed filtering by non lookup type column
v1.34 (January 05, 2011)	Bugs Fixed: Cascaded Lookup update was not working properly in IE browser with parent lookup column with more than 20 items
v1.33 (December 23, 2010)	Bugs Fixed: Fixed New/Edit item customized form
v1.32 (December 11, 2010)	Improvements: Added Content Type support
v1.31 (November 26, 2010)	Bugs Fixed: Fixed feature activation problem
v1.3 (November 16, 2010)	New Features: - Added Russian and German localization Bugs Fixed: - Fixed minor issues
v1.2 (September 02, 2010)	New Features: - Ability to edit lookup items via Edit Item form on the fly Bugs Fixed: - Fixed minor issues
v1.1 (August 03, 2010)	New Features: Added Datasheet view support Bugs Fixed:

- Fixed cascading behavior when Parent and Filter columns have different type

v1.0
(July 01, 2010)

Initial Release

See Also

[Category Column](#)

Category Column allows tracking, organizing and grouping list items. Outlook 2007 approach for elements categorization, easy indicator color changing and using of advanced tooltip, provide a high professional component style.

[Column Data Adapter](#)

Column Data Adapter is an extension component providing ability to use ArtfulBits Columns in Microsoft Access forms, reports and Microsoft Excel.

[Column Permissions](#)

Column Permissions allows you to manage access to list content on column level. Permissions can be assigned for individual users and for SharePoint groups as well and are effective in forms and list views, as well as in the SharePoint Alerts, RSS, Datasheet and even during exporting to Excel and opening with Access.

[Cross-Site Lookup Column](#)

Use Cross-Site Lookup Column for getting data from any site within site collection. Component includes a powerful function of searching over lookup list. This function provides substring matching in selected column which is very useful for large lists (over 50-100 items).

[Discussion Column](#)

Need to organize well formatted conversation in the list item without enabling list versioning? Discussion Column is the right choice. Component allows entering rich text with formatting, images, tables, hyperlinks and other features.

[Email Web Part](#)

ArtfulBits Email Web Part allows sending e-mail messages directly from Microsoft SharePoint site. You can notify task assigned users, send gratitude or just send regular e-mail message, etc.

[Follow-Up Column](#)

Follow-Up Column enables due date flags similar to Outlook follow-up functionality. Applying of flags to the list item allows adding of visual reminder in a natural way.

[Image Upload Column](#)

Quick and simple way of uploading pictures. Image Upload Column provides with ability to select a picture using file browsing dialog, upload and display it in the list view.

[KPI Column](#)

KPI (Key Performance Indicator) Column is simple graphical scorecards that can be used to evaluate business data against business goals. With this column you reduce risk to overlook information about the status of value.

[Link to Document Column](#)

Link to Document Column allows referencing files and folders placed at Document Library and provides easy and intuitive way to download files directly from column. Use this column to provide a browsing interface that allows users to browse to an object to link to instead of typing a URL.

[Parent Selector Column](#)

Parent Selector Column is used for organizing hierarchical relations in SharePoint list. Picker dialog allows choosing data from large lists. Standard Lookup column can be easily converted to Parent Selector column and vice versa.

[Password Change Web Part](#)

Password Change Web Part allows users to change their own passwords from within the SharePoint environment using standard text box interface (current password, new password and confirm new password).

[Password Expiration Web Part](#)

Password Expiration Web Part enables Active Directory users to be notified via Web Part interface that their passwords are about to expire. It also automatically sends out email notifications to users before the password expiration date.

[Professional Calendar Web Part](#)

Professional Calendar Web Part provides following key benefits: it allows combining events from different SharePoint Lists, from any SharePoint Site, in one Calendar view; allows specifying different color sets for different event sources; supports on-the-fly AJAX-enabled editing features in Outlook like style; and other enhanced functionalities.

[Progress Column](#)

Progress Column provides users with the ability to make SharePoint lists more visualized by displaying numerical data on the page using percentage-based progress bar. Professional progress bar style will make your SharePoint list really modern and stylish.

[Video](#)

Video Column and Video Web Part are powerful controls made for uploading, managing, linking and playing video files. These controls support variety of video files that can be uploaded from computer, or linked from SharePoint library or streamed from direct URL.
