BizTalk Adapters

Connect BizTalk Orchestrations with live data from applications, databases, and Web APIs!

A powerful set of Adapters that connect BizTalk with data from Dynamics, NetSuite, Salesforce.com, SharePoint, MongoDB, MySQL, etc.

Powerful BizTalk Adapters that allow users to easily connect BizTalk Server with live data from applications, databases, and Web APIs through standard orchestrations. Use our BizTalk Adapters for data synchronization, back-office integration, workflow automation, and more!

- Similar to the BizTalk Adapter for SQL Server, except for applications, databases, and service data.

- Adapters share a familiar, easy-to-use interface, similar to the BizTalk Adapter for SQL Server.

- Supports meta-data discovery and schema generation for data entities.

- Receive Adapter & Two-Way Send Adapter with support for updategrams, sprocs, and queries.

BizTalk Adapter Features:

- **Certified for BizTalk Server:** Our Adapter framework has passed the official adapter certification program established by Microsoft for BizTalk Server, administered by Unisys. Thoroughly tested for both scalability and interoperability with Microsoft BizTalk Server.

- **Straightforward Orchestration:** Fully integrated with BizTalk Server's Visual Studio .NET environment at design-time.

- **Fully Managed .NET:** 100% fully-managed .NET adapters supporting .NET Framework 2.0 and beyond.

- **Replication and Caching:** Easily copy data to local and cloud data stores such as Oracle, SQL Server, Google Cloud SQL, etc. Includes features for intelligent incremental updates to cached data.

- **String, Date, Numeric SQL Functions:** Our drivers include a library of 50 plus functions that can manipulate column and output formatting. Popular examples include Regex, JSON, and XML processing functions.

- **Collaborative Query Processing:** Our drivers enhance the capabilities of the data sources which they connect to by offering additional client-side processing, when needed, to enable analytic summaries of data such as SUM, AVG, MAX, MIN, etc.

- **Easily Customizable and Configurable:** Add or remove tables/columns, change data types, etc. without requiring a new build.

- **Secure Connectivity:** Enterprise-class security (TLS/SSL) encryption for all client-server communications.
