- Advanced Grid Features
- Excel Import/Export
- Master Detail
- Group Panel
- Filter
- Custom Editors
- Button Columns
- Hyperlink Columns
- Image Columns
- Star Ratings Columns
- Sparkline Columns
- Spreadsheet<sup>e</sup>
- MultiRow<sup>e</sup>
- TransposedGrid<sup>e</sup>
- TransposedMultiRow<sup>e</sup>
- PDF export
- TreeGrid
- Validation

### DATA MANAGEMENT

- CollectionView
- REST CollectionView
- OData CollectionView
- OData Virtual CollectionView
- Google Sheet API
- Firestore REST API
- Firestore Realtime API
- OAuth

### OLAP PIVOT GRID

- OLAP<sup>e</sup>
- OLAP PivotChart<sup>e</sup>
- OLAP PivotPanel<sup>e</sup>
- OLAP Slicer<sup>e</sup>

### PRINTING & DOCUMENTS

- Print Document
- PDF
- XLSX

### GAUGES

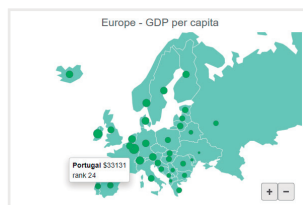

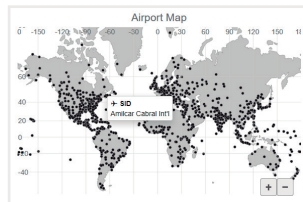

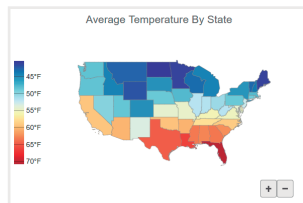

### CHARTS

### FINANCIAL CHARTS

- FinancialChart<sup>e</sup>
- Arms Candle Volume Chart<sup>e</sup>
- Candle Volume Chart<sup>e</sup>
- Candlestick Chart<sup>e</sup>
- Equi Volume Chart<sup>e</sup>
- Heikin-Ashi Chart<sup>e</sup>
- HLOC Chart<sup>e</sup>
- Kagi Chart<sup>e</sup>
- Line Break Chart<sup>e</sup>
- Renko Chart<sup>e</sup>

### MAPS

### INPUT & EDITORS

- AutoComplete
- DropDown
- Clipboard
- ColorPicker
- ComboBox
- InputColor
- InputMask
- InputNumber
- ListBox
- MultiSelect
- MultiAutoComplete
- Tooltips

### BARCODES

### NAVIGATION & LAYOUT

- Menu
- Popup
- Ribbon
- TabPanel
- TreeView

### DATETIME CONTROLS

- Calendar
- InputDateTime
- InputDate
- InputTime
- InputDateRange

### VIEWERS

- PdfViewer<sup>e</sup>
- ReportViewer<sup>e</sup>

### DESIGNERS

- Wijmo Designer
- VSCode Designer Extension

<sup>e</sup> = Wijmo Enterprise features

### FAST AND LIGHTWEIGHT COMPONENTS

Wijmo components will never bloat your web apps. Built for top performance, our components aren't just dependency-free, they are also built to be small, extensible, and fast.

### CONFIGURE COMPONENTS CODE-FREE IN THE WIJMO DESIGNERS

Experiment with Wijmo components in the easy web-based and VSCode designers!

Select from 20+ components you'd like to configure, explore all the built-in options available, and easily add the code to your Wijmo apps.

### FLEXIBLE, EXTENSIBLE API

Our easy-to-read, flexible API has a low learning curve, and components have a simple core with as many extensibility points as possible.

### FAMILIAR, ACCESSIBLE, TOUCH-FIRST UI

Charts, grids, and other components are designed to be mobile-first and adhere to ARIA standards, with familiar features and UI, including Excel-like filtering, sorting, and merging.

### FIRST-CLASS FRAMEWORK SUPPORT

Built to be framework-agnostic, Wijmo includes full support for Angular, AngularJS, ReactJS, Vue.js, and Knockout, with the same components across frameworks.

### CUTTING-EDGE TRUE JAVASCRIPT COMPONENTS WRITTEN IN TYPESCRIPT

With TypeScript, you'll get an object-oriented C# feel, design-time error checking, complete IntelliSense in Visual Studio, and the true JavaScript components are written to the ECMAScript 6 standard.
