Summary Table

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
Section 1194.21 Software Applications and Operating Systems Accessibility.	Supported. Please refer to the attached VPAT.	
Section 1194.23 Telecommunications Products	Not applicable: This functionality does not apply to Infragistics NetAdvantage Windows Forms controls.	
Section 1194.23 Telecommunications Products.		Infragistics NetAdvantage Windows Forms controls are not considered a telecommunications product.
Section 1194.24 Video and Multimedia Products.		Infragistics NetAdvantage Windows Forms controls are not a multimedia product.
Section 1194.25 Self-Contained, Closed Products.		Infragistics NetAdvantage Windows Forms controls are not a self-contained product.
Section 1194.26 Desktop and Portable Computers.		Infragistics NetAdvantage Windows Forms controls are software as defined under section 1194.21
Section 1194.31 Functional Performance Criteria.	Supported. Please refer to the attached VPAT.	
Section 1194.41 (a) Information, Documentation and Support.	Supported. Please refer to the attached VPAT.

Section 1194.21 Software Applications and Operating Systems - Detail

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported with minor exceptions: Infragistics NetAdvantage Windows Forms controls that accept focus provide keyboard support with minor exceptions.	Some Windows Forms controls like WinListBar and WinStatusBar don't take keyboard focus by design. Some WinGanttView features like task indenting and context menus are not keyboard accessible.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Fully supported: Infragistics NetAdvantage Windows Forms controls enable individuals to customize their desktop elements, including resizing and arranging controls and choosing color, size, and format options.	Infragistics NetAdvantage Windows Forms controls do not disrupt or disable accessibility features of the operating system. The toolset allows developers to customize the look and feel 0f components on a form so that they are usable by people using assistive technologies. The customization required for Assistive Technologies must be implemented by the developer using NetAdvantage Windows Forms controls, depending on the specific application requirements and objectives.

Section 1194.21 Software Applications and Operating Systems - Detail

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supported with minor exceptions: Infragistics NetAdvantage Windows Forms controls provide a well-defined on-screen indication of the current focus that moves among interactive interface elements as the input focus changes with minor exceptions.	Infragistics NetAdvantage Windows Forms controls highlight the focus location on a form. Rectangles are used with the system caret to indicate focus location within NetAdvantage Windows Forms control elements. WinGanttView does not expose the task grid active row/cell to Assistive Technology.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Supported with minor exceptions: Infragistics NetAdvantage Windows Forms controls provide sufficient information about user interface elements and program elements represented by images available in text in most cases.	Infragistics NetAdvantage Windows Forms controls generally provide information required by Assistive Technology. WinTabs can show a close button, but it is inaccessible using the keyboard. WinGanttView and WinSplitter do not expose this information to Assistive Technology.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Not applicable: This functionality does not apply to Infragistics NetAdvantage Windows Forms controls.	When indicators are shown, they can appear consistently by default. It is the responsibility of the developer to use NetAdvantage Windows Forms controls in such a way as to conform to this criterion.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Full supported: Infragistics NetAdvantage Windows Forms controls provide functionality that conforms to these criteria.	

Section 1194.21 Software Applications and Operating Systems - Detail

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Fully supported: Infragistics NetAdvantage Windows Forms controls provide functionality that conforms to these criteria.	
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not applicable: This functionality does not apply to Infragistics NetAdvantage Windows Forms controls.	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supported with minor exceptions: Infragistics NetAdvantage Windows Forms controls provide functionality that conforms to these criteria in virtually all cases.	WinGanttView displays overdue deadlines in red. A developer can provide another indication to the user of an overdue deadline to conform to this criterion.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Fully supported: Infragistics NetAdvantage Windows Forms controls provide functionality that conforms to these criteria.	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Fully supported: Infragistics NetAdvantage Windows Forms controls provide functionality that conforms to these criteria.

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supported with minor exceptions: Infragistics NetAdvantage Windows Forms controls typically used for forms input provide functionality that conforms to these criteria.	WinGanttView does not support this criterion.

DESIGN / DEVELOP / EXPERIENCE

Note to AT Users: Upon the release of software upgrades, there is often a lag between the software release date and the time it takes for some Assistive Technology vendors to upgrade their software and device drivers to support the new releases. The vendor's porting timeframe may be a factor in determining when you decide to upgrade to take advantage of new features. Microsoft provides the software code within its products to make those products "ready" for the AT devices and works closely with AT vendors in an effort to decrease time to market for new versions of AT products. Microsoft encourages both end users and purchasers of AT to contact their AT vendor to determine the current compatibility of their AT with Microsoft products.

Section 1194.21 Software Applications and Operating Systems - Detail

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supported in the following Windows Form controls: *WinGrid, WinCombo, WinDropDown, WinToolbars, WinTree, WinExplorerBar, WinTabs, WinSchedule MonthViewMulti, WinSchedule MonthViewSingle, WinSchedule WinWeekView, WinSchedule WinDayView, WinSchedule, CalendarCombo, WinDropDownButton, WinButton, WinLabel, WinListView, WinFormManager,* and all *WinEditors*	

Section 1194.21 Software Applications and Operating Systems - Detail

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Not applicable: This functionality does not apply to Infragistics NetAdvantage Windows Forms controls.	
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided.	Not applicable: This functionality does not apply to Infragistics NetAdvantage Windows Forms controls	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not applicable: This functionality does not apply to Infragistics NetAdvantage Windows Forms controls.	
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Not applicable: This functionality does not apply to Infragistics NetAdvantage Windows Forms controls.

Section 1194.21 Software Applications and Operating Systems - Detail

Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and Explanations
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Fully supported: Infragistics NetAdvantage Windows Forms controls provide functionality that conforms to these criteria.	
Section 1194.41 (a) Product Support Documentation	Supported	Documentation is provided in digital format for customers on the Web and available for no-charge download at http://www.infragistics.com
Section 1194.41 (b) Accessibility and Compatibility Features	Supported	Infragistics NetAdvantage Windows Forms controls include accompanying Help File documentation listing accessibility and compatibility features. An individual may access and view Help File topics online or may select a topic for print.
1194.41 (c) Support Services	Supported	Infragistics Developer Support is familiar with such features as keyboard access and other options important to people with disabilities.
