

Use this feature comparison table to discover the right DevPartner solution for you.

	DevPartner Studio Professional	DevPartner for Visual C++ BoundsChecker Suite	DevPartner BoundsChecker	DevPartner Runtime Suite	DevPartner Performance Suite	DevPartner Java Edition
.NET Application Analysis						
Static source code analysis with ASP .NET security scanning	✓					
Customizable rules – individual and team	✓					
Error correction advice with code examples	✓					
Line Level CPU performance analysis	✓			✓	✓	
Line Level Code coverage analysis with stability and volatility trending	✓			✓	✓	
Distributed application profiling	✓			✓	✓	
Correlated multi-tier analysis session results	✓			✓	✓	
Memory usage analysis – line-of-code level	✓			✓		
Memory consumption – runtime visualization	✓			✓		
Command line usage support	✓			✓	✓	
Native Application Analysis (unmanaged code)						
Mixed-mode runtime error detection and analysis	✓	✓	✓			
Memory leak detection	✓	✓	✓			
Native/ .NET interop analysis	✓	✓	✓			
Line Level CPU performance analysis	✓	✓		✓	✓	
Line Level Code coverage analysis with stability and volatility trending	✓	✓		✓	✓	
Distributed application profiling	✓	✓		✓	✓	
Correlated multi-tier analysis session results	✓	✓		✓	✓	
Command line usage support	✓	✓	✓	✓	✓	
Java						
Memory leak detection						✓
Memory Usage/Object Lifetime						✓
CPU performance analysis						✓
Code coverage analysis with stability and volatility trending						✓
Java IDE integration						✓
Application Server integration						✓
Distributed application profiling						✓
Correlated multi-tier analysis session results						✓
Command line usage support						✓
