

Licensing Instructions for VARCHART XTree

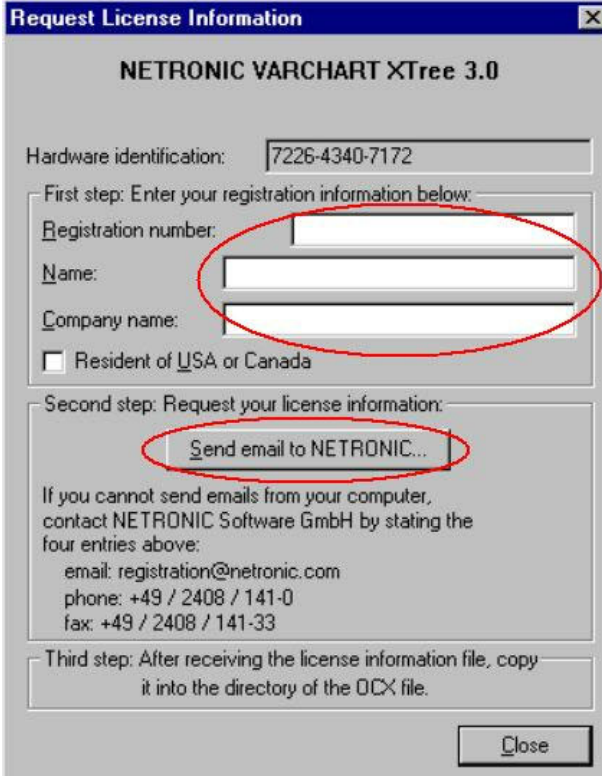

Please start your programming environment and drag VARCHART XTree onto a form. Then open the property pages. Activate the tab "General" and click on the button "Licensing ...":

This will open the licensing dialog:

Click on "Request license information from NETRONIC...". This will open a further dialog:

Enter your registration number, your name and the name of your company and click on "Send email to NETRONIC...". An email to NETRONIC will be generated automatically. As soon as we have received it, we will generate your license information file (*vctree.lic*) and send it back to you. After having received this file, please copy it to the folder in which the file *vctree.ocx* is stored.

After licensing, you have to activate the new license in each of your projects. To do so, please open any property page in each of your projects, make any change and store it. Then the new license will be activated.
