# Business Intelligence Pack

# Course Overview

Our Business Intelligence Pack includes 15 courses designed to guide you on your BI journey. This group of courses will turn you into a Business Intelligence expert by providing detailed instruction on all aspects of the BI stack. Begin your journey into BI with this impressive training suite.

## The Business Intelligence Pack Includes:

### Introduction to SSAS
In this course, you'll learn how to use SSAS in your enterprise. This training takes you from the ground-up, teaching you the fundamental skills you need to develop and deploy SSAS solutions and present this new data to your end users.

### Advanced SSAS
This course is designed to take you to the next level in your understanding of SQL Server Analysis Services (SSAS). We use a variety of lab exercises and exclusive internals lectures to ensure lectures are backed up by hands-on experience and real world knowledge.

### Introduction to SSIS
This course is designed to help you understand all aspects of SQL Server Integration Services (SSIS), the ETL tool of choice for SQL Server users.

### Advanced SSIS
For the SSIS user looking to become a more effective and advanced ETL developer, our Advanced SSIS course will teach you how to use SSIS in your enterprise to solve common extract, transform and load (ETL) challenges.

### Introduction to SSRS
Introduction to SSRS is designed to help you understand all aspects of SQL Server Reporting Services (SSRS), the reporting tool of choice for SQL Server developers.
