

Excel Pack

ON-DEMAND TRAINING

Course Overview

Our Excel Pack includes 3 Excel courses that were developed by Microsoft Excel MVPs. This group of courses takes you beyond the basics and helps you master the world's most popular software. With these courses, you will not only become an expert in Pivot Table design, but will also be skilled in building Interactive Excel Dashboards.

The Excel Pack Includes:

Interactive Dashboards with Excel

Interactive Dashboards with Excel is an online video course for data analysts, data wranglers, spreadsheet developers and managers looking to design work for decision makers.

- Learn how to develop smarter and save time in Excel
- Understand design patterns and strategies for building dashboards in Excel
- Understand how to use the Formulas and Functions for the purpose of designing dashboards

Building BI with Pivot Tables

Building BI with Pivot Tables is the perfect course to make you feel confident sourcing, cleansing, and analyzing data through Excel pivot tables and dashboards.

- Develop Excel pivot table reports and modify their aesthetics
- Learn how to leverage tools like Power Query and Power Pivot to enhance what's possible with pivot tables
- Understand how to refresh pivot table local and external data

Art & Science of Excel Modeling

The Art & Science of Excel Modeling is an in-depth exploration of how to plan, design, and maintain robust, efficient business-operational models with Excel.

- Understand basic spreadsheet design principles
- Demonstrate "real world" creative solutions to routine business problems
- Understand how to plan, design and maintain business-operational models with Excel
