

# SQL Object Level Recovery Native™

## Recovers database objects from SQL Server backups

### What is SQL Object Level Recovery Native?

SQL Object Level Recovery Native is a standalone tool that gives you the flexibility to recover individual database objects from native SQL Server 2008, 2005 and 2000 backup files instead of having to restore full backups.

### Why use SQL Object Level Recovery Native?

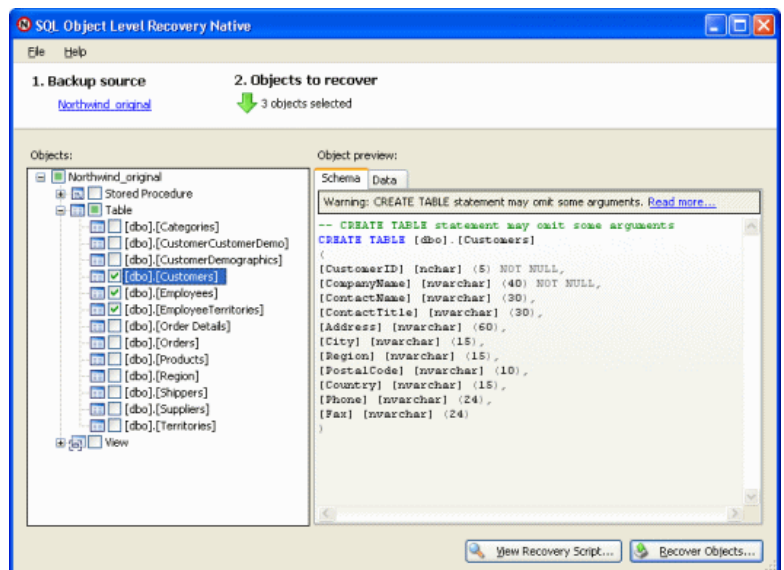

- In a disaster recovery scenario, time is short. If you only want to recover a single object from a backup, restoring a full backup can potentially take hours of time and consume considerable disk space. Performing object level recovery and inserting the object(s) into the relevant database offers the advantage of potentially huge time and disk-space savings.
- For maximum flexibility, SQL Object Level Recovery Native is licensed per user rather than per server instance. This means that you can restore database objects to any database, on any server, across your entire enterprise.

### Technical specifications

SQL Object Level Recovery Native recovers objects from SQL Server backup files created by SQL Server 2000, 2005 and 2008. You cannot restore objects to a version of SQL Server that is earlier than the version of SQL Server used to create the backup.

### Supported environments

- Windows 2000 Professional Service Pack 4
- Windows 2000 Server Service Pack 4
- Windows 2000 Advanced Server Service Pack 4
- Windows XP Professional Service Pack 1 and Service Pack 2
- Windows 2003 Server Standard Edition and Windows 2003 Server Enterprise Edition:
  - For 32-bit versions of Windows, Service Pack 1 and Service Pack 2 are supported but not required.
  - For 64-bit versions of Windows, Service Pack 1 is required. You must install this separately for Itanium; for x64 it is installed automatically. Service Pack 2 is supported but not required.
- Windows Vista
- Windows Server 2008
- Windows Server 2008 R2
- Windows 7
- 32-bit and 64-bit versions of SQL Server 2008, SQL Server 2005 and SQL Server 2000 (SP 3 or later)

Select the database objects you want to recover and click Recover Objects.

# SQL Object Level Recovery Native™

## Operating requirements

- MDAC 2.8+
- 256 MB RAM
- 100 MB hard disk space

## Related products

- SQL Object Level Recovery Pro is included with [SQL Backup Pro](#) and enables you to recover objects from SQL Backup (.sqb) files. SQL Object Level Recovery Pro requires a SQL Backup Pro license on the server you are restoring objects to.
- For advanced integrity constraints when recovering data, use [SQL Compare](#) and [SQL Data Compare](#) to compare and synchronize the schema and the contents of the backup you are restoring from and the database you are restoring to.

A status window informs you about the outcome of your object recovery. If there are any problems, select the progress message to view more details in the messages pane.

## How much does SQL Object Level Recovery Native cost?

SQL Object Level Recovery Native is priced **£125 per user**. The advantage of per user licensing over per server licensing is that you can restore database objects to any database, on any server, across your entire enterprise.

SQL Object Level Recovery Native can also be purchased in the SQL Backup Bundle or SQL Toolbelt. Bundles of our SQL tools represent a substantial saving over the cost of purchasing the products individually.

### ➤ SQL Backup Bundle™

SQL Object Level Recovery is also available as part of the SQL Backup Bundle, a suite of tools to simplify and speed up database administration tasks.

SQL Object Level Recovery Native + SQL Backup Pro + SQL Response + SQL Multi Script = **£595**

**Annual support and upgrade contracts are available for 25% of the product's purchase price.**

### ➤ SQL Toolbelt™

The SQL Toolbelt contains all Red Gate tools at a discounted price. With SQL Object Level Recovery Native, SQL Compare and SQL Data Compare, it lets you recover objects and compare as well as synchronize the schema and the contents of the backup you are restoring from and the database you are restoring to.

SQL Object Level Recovery Native + SQL Compare Pro + SQL Data Compare Pro + SQL Dependency Tracker + SQL Packager + SQL Prompt Pro + SQL Refactor + SQL Backup Pro + SQL Data Generator + SQL Multi Script + SQL Doc + SQL Comparison SDK + SQL Response = **£995**

**Annual support and upgrade contracts are available for 25% of the product's purchase price.**
