

VersionRecall™ 2020

VersionRecall 2020 is the simplest way to manage multiple versions of files on your computer.

- ❖ Simple setup takes only minutes.
- ❖ Fast and efficient. Only copies modified files.
- ❖ No complicated APIs, database engines or developer tools needed.
- ❖ Sign PowerShell scripts before submitting them.
- ❖ No unwanted “synchronization” that can overwrite your work.
- ❖ Easily restore a previous version of a file.
- ❖ Windows Explorer integration.
- ❖ Includes file comparison tool.
- ❖ Works with binary files too.
- ❖ Fast and easy Zip files.
- ❖ Easily create backups on Disk, CD or Flash drives.
- ❖ Fully automatic mode.

VersionRecall™ 2020

SAPIEN

VersionRecall automates the most widely used manual process of creating backups and maintaining multiple versions of your files.

Simple Version Control

VersionRecall is all about simplicity. From installation to daily use, our goal is to make the saving and recalling of multiple versions of your files *easy*. We have eliminated the complexity of APIs, database back ends, developer tools, and foreign file formats. There is no automated synchronization like with cloud-based storage solutions that will automatically overwrite your files. And your versioned files are stored as files in their original format, not in a database or in some modified, proprietary format.

So easy to use

The simple and quick setup lets you select a folder that VersionRecall will manage as well as a “backup location” where your previous

versions will be stored (usually on an external drive or network drive.) From that point on, work as you usually do, saving the file locally, and when you are ready, simply submit the file using VersionRecall Explorer or our Windows Explorer integration. Or, setup VersionRecall for automatic submission at a predetermined time.

Trouble free backups

Do you create backups by dragging folders to a NAS, network drive, CD or by making zip files? VersionRecall lets you do that with the simple push of a button. No need to change *how* you backup, just make it easier!

Windows Explorer Integration

Our VersionRecall Explorer application is full of functionality, but sometimes you just need it super simple and easy. With our Windows Explorer integration you can submit a version of your file with just a few mouse clicks.

Built-in File Comparison

So now you have multiple versions of your file and want to know how they are different. Use the integrated file comparison tool to see where your versions differ and even merge in selected differences.

Simple, Fast and Reliable.

VersionRecall. Now *that* is simple version control.
