Special DITA Maps Manager to help you manage DITA maps

Wizard to create multiple topics at once

Operations to automatically convert between DITA topic types

Locate and insert reusable content with DITA Reusable Components view

Insert or embed multimedia objects for HTML and PDF output

Support for DITA specializations and automatic integration

Collaboration

Track changes in XML documents

Add review comments and reply to them

Review panel that presents track changes, comments, and highlighted text

Filter review items by the type, author's name, or date

Allows unlimited search results in review items (tracked changes, comments, etc)

Working with Modular XML Files

Validate imported tree of modules in Master Files context

Search and refactoring options for ID and IDREFS

Display the Hierarchy or Dependencies of an XML Document

Simple text editor with familiar layout and actions

Visual syntax highlighting, indentation, and line numbers

Configure syntax highlighting colors for each type of document

XML element annotations presented in tooltips and special views

Tag folding to simplify document editing

Bookmarks allow you to mark locations in a document

Various helper views, continuously synchronized with the main editor

XML Grid Editor

Convenient layout that groups similar elements in tables

Grid actions such as sort, insert, delete, rename

Drag and Drop and multiple selection support

Copy/Paste to and from spreadsheet applications (such as Excel)

Archive Support

Work with various archive types (OOXML, ODF, EPUB, ZIP, JAR, IDML)

Open files directly from archives for editing purposes

Validate files opened directly from an archive

Transform files directly from an archive

Process archive files with XQuery

Find/replace content in files located inside archives

**ANT Scripts**

Edit and validate ANT scripts

Run ANT transformation scenarios

**XProc Scripts**

XProc transformation scenarios

XProc script editor includes content completion and automatic validation

**XML-Aware Spell Checker**

Spelling errors highlighted as you type

Configurable personal dictionary

Various change, ignore, and replace actions

Supports multiple language dialects

Add dictionaries for new languages

Suggestions for unrecognized words accessible from a pop-up menu

AutoCorrect feature to fix misspelled words

**XML Formatting**

Canonicalize XML files

XML-Well Formedness Checker

Integrated back-mapping for error reporting

Format and indent (pretty print) XML files

Integrated XML Validation

Built-in automatic validation as you type

Predefined manual validation scenarios

Supports XML Schema, Relax NG, NVDL, DTD, and Schematron validations

Supports the W3C XInclude recommendation

Trace error messages to source document code

Link to the exact location in the XML Schema specification

Integrated support for third-party XML parsers and validators

General XML Editing Support

Various common editing actions (copy/paste, undo/redo, etc.)

Support for many file-encoding formats (UTF-8, UTF-16, etc)

Print XML documents

Wrap text on documents with long lines
